

Stabilisation

End-to-End Support for Digital Transformation

Our commitment to you starts by taking the time to understand the challenges you face. Our **Strategic Consultancy** is based on many years of expertise in system services. By collecting data, carrying out thorough analyses to identify opportunities, we will help you maximise the benefits of transformation of clinical care and operational services whilst minimising risk.

Led by former NHS and Social Care CIOs, COOs, CMOs, and Transformational Directors, our real-world experience and comprehensive services support the full transformation and lifecycle of major systems deployments.

From ensuring **System Readiness** through to **Initiation and Deployment** to **Go-Live and Stabilisation**, we are with you step by step on the journey from assessment to implementation and beyond.

Once systems have gone live there will inevitably be further configuration and workflow issues that need to be addressed. Data migration can also present challenges. We will be on hand to assess how systems are working and engage with stakeholders to ensure optimal performance and help staff overcome any difficulties they may face working with systems post go-live.
