

RTT, PTL, Data Quality, Data Validation Support Services

Ideal Health's data validation service allows organisations to optimise their patient data. We meticulously identify errors across systems, improving RTT performance and PTL (patient tracking list) accuracy. Backed by Root Cause Analysis, Ideal Health delivers essential insights for robust healthcare management with unparalleled accuracy and efficiency.

Service features and benefits

Service features

- Data Validation across multiple cohorts, systems, and pathway types
- Vendor Agnostic Pre-Implementation Data Cleansing
- Vendor Agnostic Post-Go Live/Migration Data Quality Review
- RTT Health Check assessment and SOP review
- Root cause analysis and audit including data sampling
