Who We Are

01

We're a global technology group
that help organisations

thrive through change

“Change will be the only constant
in the next decade”

Sir Demis Hassabis
CEO, Google DeepMind

Our Core Capabilities

Cloud & Data Transformation

Accelerating growth with strategic cloud migration, FinOps optimisation, and robust data architecture on Google Cloud and AWS.

- **Cloud Infrastructure:** Google Cloud and AWS Infrastructure & Engineering, Google Cloud Partner-Led Premium Support, and 24/7 Managed Services.
- **Strategic Migration:** Cloud Migration (Legacy apps, VMware, Data Warehouse) to Google Cloud (GCP, BigQuery, Gemini, Workspace).
- **Data & Optimisation:** Data Architecture and Infrastructure Design, Cloud FinOps & GreenOps (Cost Reduction/Sustainability), and BI Dashboard Development.

Digital & AI Engineering

Building the future through custom application development, intelligent AI agents, and exceptional user-centric design.

- **Custom AI & ML:** Custom Vertex AI Agent Development, Gemini Enterprise AI Agents, and Data Science/ML/AI for Healthcare.
- **Digital Product Design:** Service Design, User Experience (UX), Customer Portals, and Mobile/Web Application Design & Build.
- **Platform Development:** Frontend Engineering, Agentic Software, Knowledge Tools, and eCommerce/eLearning Platform Development.

Cyber Security & Resilience

Protecting your business with proactive managed services, expert strategy, and immediate incident response. We embed security across your entire digital footprint.

- **Managed Defense:** Managed Detection and Response (MDR/SOC) and Vulnerability Management as a Service (VMaaS).
- **Security Strategy:** Cyber Security Strategy and Transformation, Cyber Resilience, and Security in Supply Chain.
- **Trust & Compliance:** Data Protection Consultancy (One Trust, Inquiry Support), Cyber Security Frameworks, and Cyber Incident Response.

We deploy **frontier** technology to help our customers:

01

Work
Smarter

02

Engage
Personally

03

Stay
Secure

01

Work Smarter

We build the secure, modern, scalable infrastructure, apps and workflows that boost bottom lines.

Key Outcomes

- Increased profitability
- Scalability, reliability & Uptime
- Resilient, "secure by design" architecture
- Trusted, timely, self-serve insights & analytics
- Predictable, optimised cloud spend
- Collaborative, digital workspaces
- Carbon footprint reduction
- Reduced total cost of ownership

Enabling the UK's National Data Transformation via Google Cloud (Integrated Data Service)

Secure Data

UK

Government

National Data Transformation

Google Cloud

Challenge The ONS needed to build the Integrated Data Service (IDS) – a secure, national data platform on Google Cloud. The critical obstacle was the lack of predictable, SC-cleared technical capacity to build, maintain, and scale the complex, secure environment.

Solution We provided a dedicated, SC-cleared Google Cloud Managed Support Service (MSP) team. The solution delivered flexible Platform and Application Development engineering capacity, uniquely supporting the rapid, agile needs of the IDS Hub.

Outcome Our support ensured the IDS successfully moved through three Public Beta phases and achieved stable operation. The result is transformed analytical use of government data, enabling national policy-makers and decision-makers to make better, faster decisions affecting citizens' lives.

02

Engage Personally

We create delightful digital touch points that capture attention, convert sales, and keep customers coming back.

Key Outcomes

- Delightful, intuitive, frictionless digital experiences
- Improved customer experience & intelligence
- Conversion rate optimisation
- Revenue uplift
- Increased loyalty
- Pricing & discount optimisation
- Improved paid media performance

Google

Building immersive digital products and experiences for billions of global users.

Engage Personally

Global

Tech

Customer Platforms

Google Cloud

Challenge Google wanted to create a platform that would help people learn and adopt the digital skills they needed to find a job and grow in their career, or boost their own business.

Solution Since 2017 we've designed, built and maintained three platforms; the Digital Workshop platform, the AI for Business tool, and the Grow with Google marketing site.

Outcome The platforms host 153 courses in 53 markets and 31 languages. There are 11 million + users globally and 1 million + have seen a positive impact in the EU.

03

Stay Secure

We establish and maintain the systems that protect businesses from threats, fines, and downtime.

Key Outcomes

- Improved cyber resilience
- Proactive threat detection and response
- Threat noise reduction & prioritisation
- Data governance, trust and reportability
- Regulatory compliance

Secure by Design for Mission-Critical Defence Systems

Defence

Government

Assurance

Cyber Security

Secure by Design

Challenge Dstl (part of UK MOD) needed to deploy a new system onto Royal Navy warships. This highly sensitive project required expert support to implement a Secure by Design (SbD) approach, manage high operational risk, and adhere to deep MOD security policy knowledge (JSP 440/453) in a highly classified environment.

Solution A multi-disciplinary, security-cleared team was deployed for a two-phase engagement. This included detailed threat modelling, SbD policy alignment, and developing a technical roadmap. The solution focused on the rigorous implementation and testing of robustness controls, including encryption and OS hardening.

Outcome Dstl received a robustly secured system component and a compelling Security Assurance Report, providing clear evidence for accreditation support. This successful, risk-managed delivery enabled the client to securely proceed with deploying the critical naval capability.

Public Sector Focus 02

We provide the creative approaches and specialist knowledge needed to build a cyber resilient public sector and transform services from end-to-end

Core Public Sector Challenge	Qodea's Multi-Disciplinary Focus	Supporting Capabilities
Maximising Public Value and Efficiency	Delivering accessible and efficient services that secure citizen trust and deliver better value for public money.	Digital & Application Services (UX/CX, Web/App Development), Cloud & Infrastructure Engineering (Cost Reduction, Optimisation), Data, AI & Analytics (BI, Prediction Modeling).
Strategic Resilience and Compliance	Operating securely and compliantly amid global uncertainty and changing regulations. Aligning with the Government Cyber Security Strategy 2022-2030.	Cyber Security & Governance (DSPT, NCSC CAF, Supply Chain Assurance), Cloud & Infrastructure Engineering (Security, Support), Data, AI & Analytics (AI Security/Governance).
Data-Driven Policy and Service Design	Leveraging data, ML, and AI to improve citizen outcomes and policy effectiveness through innovation at scale.	Data, AI & Analytics (Custom AI, Data Science, Data Architecture), Digital & Application Services (Service Design, Knowledge Tools).

03

DevOps (Continuous Integration/Continuous Delivery/Deployment): Definition

Delivering Value to the Public Sector

Modernising legacy DevOps and data integration platforms is a critical enabler for public sector digital transformation. Qodea helps departments move away from the high total cost of ownership (TCO) associated with managing on-premise or self-hosted tools like Jenkins, GitLab, and Kafka.

By migrating to Google Cloud's serverless and managed services, such as Cloud Build and Pub/Sub, organisations can significantly reduce infrastructure overhead, improve system reliability, and accelerate the delivery of citizen-centric services.

Our evidence-based approach aligns with the Technology Code of Practice and Government Cyber Security Strategy, ensuring your transition is secure by design. We help you unlock operational efficiencies and demonstrable value for money by replacing costly, rigid legacy patterns with scalable, cloud-native automation that supports agile delivery and informed policy-making.

Service Overview

We provide a comprehensive, expert-led migration service to modernise your DevOps toolchains and data integration platforms on Google Cloud. We don't just move workloads; we partner with your teams to embed Platform Engineering best practices, transitioning from legacy tools (e.g., Jenkins, Informatica, IBM MQ) to high-performance, cloud-native alternatives like GKE, Artifact Registry, and Dataflow.

Our multi-disciplinary team of SC-cleared engineers brings deep technical expertise in Infrastructure-as-Code (Terraform) and GitOps, ensuring that your new environment is automated, resilient, and compliant from day one. We focus on a collaborative delivery model, acting as an organic extension of your team to translate technical complexity into clear, actionable outcomes that drive long-term digital maturity.

Service Benefits and Features

04

Service

Benefits

- 01 Reduced Infrastructure Costs: Eliminate the burden of managing self-hosted Jenkins or GitLab servers via serverless alternatives.
- 02 Accelerated Build Times: Leverage serverless Cloud Build for high-concurrency, parallel execution of CI/CD tasks.
- 03 Enhanced Security Posture: Benefit from integrated vulnerability scanning, binary authorisation, and robust audit logs.
- 04 Infinite Scalability: Scale event streaming and messaging effortlessly with serverless Pub/Sub integration.
- 05 Improved Developer Productivity: Automate manual tasks through GitOps and robust Infrastructure-as-Code frameworks.
- 06 Legacy Debt Reduction: Systematically replace proprietary ETL connectors and legacy integration patterns with cloud-native methods.
- 07 Sustainable Operations: Reduce your carbon footprint by moving to Google's energy-efficient, serverless cloud infrastructure.
- 08 Informed Decision-Making: Access trusted, real-time analytics and insights across your entire delivery platform.
- 09 Proven Public Sector Expertise: Delivered by a partner with a track record of enabling national data transformations for ONS and Dstl.
- 10 Expert Support: Access to SC-cleared, 24/7 managed services and Google Cloud Partner-Led Premium Support.

Service

Features

- 01 Jenkins Modernisation: Seamless migration from Jenkins to serverless Cloud Build or Jenkins-on-GKE for improved scalability.
- 02 CI/CD Pipeline Migration: Migration of existing GitLab CI/CD, Azure DevOps, and CircleCI pipelines to Google Cloud.
- 03 Source Control Transition: Expert migration for GitHub, Bitbucket, Azure Repos, and legacy SVN repositories.
- 04 Container Registry Consolidation: Move from Artifactory, Nexus, or Docker Hub to a unified, secure Artifact Registry.
- 05 Messaging Modernisation: Transition from Apache Kafka, IBM MQ, or RabbitMQ to serverless Pub/Sub or Managed Kafka.
- 06 ETL Tool Migration: Modernise Informatica, Talend, SSIS, and DataStage workflows into Cloud Data Fusion or Dataflow.
- 07 GitOps & IaC Implementation: Full setup of Terraform, Ansible, and GitOps workflows for automated environment management.
- 08 Integrated Security: Migration of secrets to Secret Manager and integration of automated security and vulnerability scanning.
- 09 Technical Roadmap: Detailed planning including threat modelling and "Secure by Design" policy alignment (JSP 440/453).
- 10 Capability Building: Comprehensive developer training and platform engineering knowledge transfer included.

Why They Keep Coming Back

07

Partnership Focus

01

People Centric

We embed with your team, acting as an organic extension. Your success is our sole measure of achievement.

02

In Your Language

We translate technical complexity into clear business terms, ensuring alignment and informed decision-making across all levels.

03

Laser-Focused

Every solution is custom-designed based on your unique context, needs, and strategic objectives. No 'one-size-fits-all' templates.

Drive and Excellence

01

Relentless Drive

We challenge the status quo and push boundaries, ensuring the best possible, highest-value outcomes are achieved, every time.

02

Adaptive Expertise

Our consultants maintain an unwavering commitment to continuous learning, keeping you at the forefront of emerging technologies and best practices.

03

Total Accountability

We own our decisions and commitments. The buck stops with Qodea – we deliver on our promises, and we learn from every experience.

Outcomes at pace

We fill the void between niche boutiques and bloated GSIs.

We're agile experts with the scale to deliver full-stack solutions on enterprise-grade infrastructure.

We're called in when competitors say it's impossible, or have already failed.

We ship tangible outcomes into production, fast.

Social Value

Environment

The Qodea Group is deeply committed to achieving Net Zero emissions by 2030, well ahead of the UK Government's 2050 target. Since our 2022 baseline, we have achieved a reduction equivalent to 51% of our total emissions (487.7 tCO₂e reduction). Our Carbon Reduction Plan is completed in accordance with PPN 06/21 guidance and has been formally reviewed and signed off by a Director. Our commitment is integrated into our strategic plans to deliver long-term, verifiable sustainability.

Wellbeing

As a modern business, which operates in complex environments, we know the importance of health and wellbeing. We provide an Employee assistance Programme including access to an online platform and 24hr confidential helpline. This provides counselling support and a library of wellbeing information, ensuring all staff have practical support for all aspects of physical and mental wellbeing.

Economic Inequality

Qodea is committed to addressing economic inequality through community support and skills transfer. Our employees are entitled to paid time off to engage in volunteering activities, supporting both company-endorsed initiatives and charities of their personal choosing. This flexibility ensures maximum social impact while being managed via robust internal governance to maintain service delivery standards.
