

## eVid Scheduler - Pricing

### 1. Overview

EVID is Unilink's cloud-hosted facilitators scheduling application, designed to support the planning, coordination and delivery of structured interventions and programmes within custodial and community justice environments.

The service enables operational teams to manage facilitator availability, session scheduling and resource allocation in a controlled and auditable way. EVID supports efficient programme delivery by reducing manual scheduling effort, improving visibility of planned activity and enabling better use of staff and facilities.

### 2. Pricing approach

| Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | Price  |
