Ensono Services on G-Cloud 15

Ensono enables public sector organisations to achieve better outcomes through **cloud-first solutions**. Our team of technology consultants and engineers brings **over 15 years' experience** delivering complex, high-impact projects for the UK's leading organisations. We work collaboratively with clients understanding their goals and applying **deep technical expertise** to design, build, and manage the right solution.

Our G-Cloud 15 Services:

- **Data Assessment & Implementation:** Secure, optimise, and modernise your data for the cloud.
- **Strategic Modernisation Planning & Implementation:** Transform legacy applications and infrastructure for agility and resilience.
- **SRE as a Service (SREaaS):** Proactive reliability, automation, and performance for critical systems.
- **Enterprise Test Services:** Comprehensive testing to ensure quality, security, and compliance.
- **Identity & Access Management:** Deliver secure, scalable, and frictionless access across your organisation.
- **Flex® Cloud Services:** Scalable, on-demand cloud engineering and managed services that flex with changing priorities.

Our public sector track record includes strategic platforms for central government, rapid NHS Covid-19 chatbot delivery, and support for local authorities, transport, education, housing, and charities. We're also recognised for delivering results in the private sector. See our website for client stories. [Client Stories | Ensono](#).

Ensono Enterprise Test Services

Why clients engage us for quality assurance & testing

Enterprise Test Service Phases

Enterprise Test Assessment

Review of your current test strategy, providing actionable recommendations across...

Overall testing strategy

Automation enhancements

Optimization of 'path to live'

UAT processes and tools

What We Measure

Automation coverage and effectiveness

Defect leakage and defect escape rates

Test cycle time & path-to-live efficiency

Environment & test data readiness

Coverage of business logic and workflows

Quality governance and adherence

Enterprise Test Implementation

Design, implementation, and improvement of...

End-to-end regression testing solution

Automated testing framework

Test strategy and test plan development

Process and practices (UAT, path to live)

Handover and training

Test Lifecycle

Why Ensono

Experts in application performance and testing

We specialise in developing automated test frameworks and processes that ensure the swift identification and resolution of performance issues.

Diverse testing experience across a huge variety of technology and tools

Our technology-agnostic expertise, enables us to address the unique needs of our clients using their preferred tools.

Experienced development team able to implement our recommendations

We can implement the changes for you, or with you, to realise the benefits of our recommendations.

Client stories

Retail lender accelerates test execution time by 97%

CLIENT

A large, publicly traded retail and financial services company.

CHALLENGE

A legacy POS system and manual testing process were causing significant release delays. Their an eight-person QA team was responsible for testing a 25-year-old point-of-sale (POS) platform that spanned hundreds of stores across the United States and Latin America. Each regression cycle took more than two weeks to complete, creating release bottlenecks and slowing innovation.

The legacy POS codebase—developed by multiple teams over decades—was inconsistent and complex. Dependencies between store hours, employee logins, and cash management added further challenges. Manual testing could no longer keep pace with the business.

SOLUTION

We began by identifying the best candidates for automation. Key objectives were to: create readable, reusable test scripts that served as living documentation; enable easy scaling with minimal code setup; and maintain clear visibility through integrated reporting.

A smart state management system was developed to synchronize shared resources—such as stores, employees, and cash drawers—ensuring tests ran in parallel without conflict. To accommodate operations across multiple time zones and languages, Ensono designed the system to emulate store-specific environments, enabling parallel execution from a single build agent. The final solution included:

- A new automation framework covering 534 test cases
- Auto-generated release notes and test reports
- A live dashboard for QA visibility and test health

OUTCOMES

- Regression test time reduced by 97%—from 87 hours to less than 3
- Automated test execution now runs with every release
- Readable HTML reports and release notes are generated automatically
- CI/CD integration enables faster, more reliable delivery cycles
- QA team upskilled, improving capability and confidence

More about us

Review

We follow the GDS Service Manual's approach to agile delivery

Discovery

- A short (typically four to eight week) phase focused on understanding the problem to be solved: Researching user needs, agreeing business goals, detailing constraints, and identifying ideas to test at alpha.

Alpha

- Another short (typically six to eight week) phase focused on building prototypes and testing ideas, working with a small group of users or stakeholders.
- The objective of this stage is to get enough feedback on a prototype to determine whether to move on to beta.

Beta

- A phase focused on starting to build the best idea from alpha. An initial, private beta will involve a limited number of users to gather feedback to make improvements.
- Once we've done that and are confident that the service can operate at scale, we can move into public beta, opening up the service to everyone that needs it and preparing for live.

Live

- The focus of the live phase is to support the service on a sustainable, ongoing basis, continuing to make improvements, and iterating to take account of emerging needs.
- Success is measured against the targets agreed during the earlier phases.

Why Ensono?

- **Business outcomes first:** We focus on delivering better business results, not just technology solutions.
- **Vendor agnostic:** Independent advice backed by partnerships with all major cloud providers, without commercial bias.
- **Code less, deliver more:** We leverage existing technologies and prefer PaaS for hyperscale performance, risk reduction, and cost efficiency.
- **Proven delivery:** A decade of engineering excellence, supported by Ensono Stacks, our toolbox of tested approaches and automation.
- **Knowledge transfer:** We train and empower in-house teams for long-term self-sufficiency, with managed services available when needed.

Ensono has unique expertise, focus and flexibility

Capability & Commitment

With expertise in **AWS, Azure, GCP**, private cloud and legacy systems we excel in complex environments, helping our clients to **unlock their most valuable data and insights from mainframe to cloud.**

Outcome Focused

We focus on **your core business objectives** and outcomes with a **technology agnostic** approach, independent of vendors and point solutions.

Proactive partnership

We don't just reimagine your strategy, we roll up our sleeves and deliver our recommendations. Ensono is an **extension of your team, built around your needs.**

Ensono continues to be recognised for its technology, people and innovation

Security & Compliance Certifications

At Ensono, our **dedication to excellence** extends beyond industry accolades to include a steadfast **commitment to security and compliance**. Our certifications are a testament to the **rigorous standards** we uphold to protect and serve our clients with **reliability and trust**.

ESG Commitment

The Environment

We are reducing energy use and material waste through environmentally responsible management of offices and data centers. We have implemented programs that:

- Monitor air emissions
- Recycle cooling water and electronic waste
- Reduce energy consumption
- Ensure safe disposal of hazardous materials
- Use renewable and/or lower impact energy sources

2050 Net Zero Goal

Social Responsibility

By developing people in a diverse, equitable and inclusive workplace, we offer growth opportunities for associates and more innovative solutions for clients. Initiatives include:

- Unconscious bias training
- Tech Talent Charter (U.K. nonprofit)
- Ensono Academies:
 - Junior Academy for inner city youth
 - Ensono Mainframe & Cloud Academies
- Women Connected mentoring program
- Associate development, recognition and engagement programs

Governance

We are a trusted global MSP, serving clients throughout the world. Our code of conduct defines standards for a fair and safe workplace. Governance practices include:

- Board oversight of financial audits and reporting; technology strategy and investment; and compensation plans
- Annual compliance, privacy and data protection training for all associates
- Comprehensive Risk Management program
- Compliance with industry regulations

Culture That Shows Up in Your Results

Being a great ally starts with our people and ends with stronger results for you.

What you get

24/7 extension of your team

Globally aligned, locally accountable
