Overview

Omniassa Horizon Cloud Service on Microsoft Azure is the lowest-cost approach to deploying Windows virtual desktops and apps from Azure with all the enterprise-class capabilities of Omniassa Horizon. From a single cloud-based console, you can deploy and manage desktops wherever they are—on-premises or in Azure—with cloud-native features like application, user environment, and power management, plus much more.

Horizon Cloud Service on Microsoft Azure provides;

- Leverage your Azure Virtual Desktop benefits - Horizon Cloud Service on Microsoft Azure adds incredible value to Azure Virtual Desktop through advanced power management, application and user environment management, and hybrid capabilities.
- Hybrid Desktop Virtualization - Horizon Cloud Service on Microsoft Azure lets you deliver the most cost-effective, cloud-based Windows virtual desktops and applications in a hybrid environment with existing on-premises investments.
- Application and User Environment Management - Simplify application management while reducing cloud consumption costs with App Volumes while using Dynamic Environment Manager to add advanced user environment management capabilities.

Pricing Options

Prices listed are monthly based on 12 months prepaid with Production-level support. Additional term lengths and billing options are also available. Licensing models are available on either a per named or per concurrent user basis.

Pricing Considerations

Please refer to the below key points when considering buying Omnissa offerings:

- Pricing based upon a 12m prepaid subscription
- Subscriptions require 1 core order per required environment plus required number of add-on orders to make up total user quantity
