AON

Speed

"We had it up and running in one day."

Global head of cyber at Aon

Microsoft

Impact

"I have not seen anything else that can give you as big of an impact as Wiz."

Igor Tsyganskiy, Global CISO Microsoft

MARS

Simplicity

"Wiz demystifies a lot of Azure, so we can understand it well enough to talk to other teams, despite not being cloud experts."

Head of Threat at Mars

Pricing & packaging for your security program

Pricing is designed to be simple—license usage is based on the number of billable units in your environment

What are billable units?

To calculate billable units, Wiz uses product-specific metrics to identify usage. For example, **Wiz Cloud** is based on cloud resources like virtual machines, containers, and databases, and imported assets from 3rd party tools, **Wiz Code** is measured by the number of developers, **Wiz Defend** by logs ingested, and **Wiz Sensor** by number of sensors deployed. Since environments are dynamic, Wiz averages usage over time and displays it clearly on the Wiz Licenses page—so you always know where you stand.

We understand cloud growth can be unpredictable, so if you exceed your license, Wiz keeps protecting your environment. A sales rep will only reach out if the overuse is persistent, not just a one-time spike.

License Overview

Wiz Cloud

Gain visibility and proactively reduce risk with Wiz Cloud which analyzes cloud risks across misconfigurations, vulnerabilities, identities, data, and more to surface the most critical issues. Extend to hybrid and on-prem with Wiz UVM, unifying and enriching findings from 3rd party tools.

Wiz Code

Catch security risks early with Wiz Code, extending Wiz to IDEs and version control to help teams fix issues before they reach the cloud and improve collaboration between security and development teams.

Defend Bundle

Wiz Defend

Wiz Defend detects and stops cloud threats before they escalate, providing real-time monitoring, investigation, and response tools. With enhanced visibility and automation, it helps teams reduce response times, minimize risk, and keep your business secure.

Wiz Sensor

The Wiz Runtime Sensor enhances threat detection by continuously monitoring and blocking threats in runtime and scanning for security risks on private infrastructure workloads. This runtime visibility enables teams to detect risks and threats across hybrid environment.

License Use Cases

Wiz Cloud

- Configurations (CSPM)
- Unified Vulnerability Management (UVM)
- Cloud identities (CIEM)
- Container security
- Agentless workload protection (CWPP)
- IaC scanning
- Compliance
- Data security (DSPM)
- AI security (AI-SPM)
- Attack path analysis

Wiz Code

- Code to cloud mapping
- SCA and SBOM
- Secrets and sensitive data scanning
- IaC misconfigurations scanning
- Malware scanning
- 3rd-party scanner findings ingestion (e.g., SAST)
- VCS & CI/CD Security Posture Mgt.
- IDE, PR, and CI/CD integrations and 1-click fix suggestions
- Threat detection & response in VCS and CI/CD

Defend Bundle

Wiz Defend

- Cloud detection & response (CDR)
- Cross-layer threat detection and behavioral analytics
- Cloud Investigation and response automation (CIRA)
- Code-to-runtime mapping
- Forensics and incident response automations
- Cloud threat intelligence
- Identity detection and response (ITDR)
- Data detection and response (DDR)

Wiz Sensor

- Runtime detection & response
- Supports Kubernetes, Serverless, Linux, Windows platforms
- Sensor-based workload scanning for on-prem workloads (Vulnerability, Host, Configuration)
- Vulnerability & SBOM runtime validation
- Runtime hunting & intelligence
- Runtime forensics
- File Integrity Monitoring
- API discovery

License Billable Units

Wiz Cloud Billable Units

- Virtual Machines
- Container Hosts
- Serverless Containers
- Serverless Functions
- PaaS Databases
- Storage Buckets
- Data Warehouse
- Non – OS Disks
- Registry Container Images
- Imported Virtual Machine Assets (3rd-party tools)
- Imported Network Address Assets (3rd-party tools)

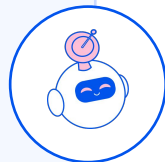

Wiz Code Billable Units

Based on the number of active developers contributing to your codebase and have been active within the last 90 days

Defend Bundle

Wiz Defend Bundle Billable Units

Units are counted as a bundle of Wiz Defend and the Wiz Runtime Sensor. Defend Bundle billable units are based on the total monthly log volume ingested from your environment, measured in gigabytes (GB), and the number of deployed Runtime Sensors.

Hear it from customers

Wiz Cloud

"The Log4J situation highlighted how remarkable Wiz is: there are plenty of tools out there that can tell you where Log4J is, but nobody else was able to tell you what mattered and what didn't in that scenario."

Rob Bruce

Head of Critical Infrastructure,
Bridgewater Associates

Wiz Code

"Wiz gives us a common language between security and engineering. It's one tool that everybody has access to, it's super intuitive, and it's easy to leverage because the context we need to work together and do our jobs is all in one place."

Koen Hendrix

Director of Product Security, Zendesk

Wiz Defend & Runtime Sensor

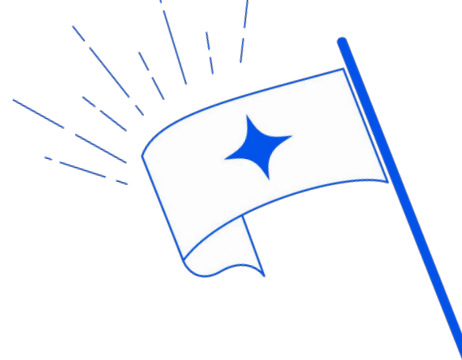

"The value of Wiz Defend cannot be overstated. The rich context and automated data enrichment, correlation, and prioritization of threats has streamlined our workflows and significantly reduced our manual workload, allowing us to focus on critical threats and get one step closer to operating at machine speed."

Quincy Castro

Chief Information Security Officer,
Redis

Wiz Support Plans

Wiz Paid Support – Designed for enterprises seeking highly tailored, proactive technical engagement.

Paid Support Tiers:

- **Elite:** 30-minute initial response time SLA & ongoing advisory services
- **Enterprise:** 2-hour initial response time SLA & monthly advisory services

Technical Account Manager

Wiz Technical Account Managers are here to drive your success with dedicated support throughout:

Onboarding

Kickoff, onboarding, and success planning sessions

Adoption

Ongoing success syncs, best practices, utilization monitoring

Technical Advocacy

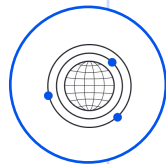

Feature requests, preview programs, escalations, tenant health review

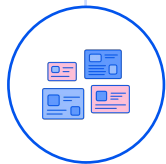

Strategic alignment

Success plan progress, roadmap overview

Wiz Paid Support

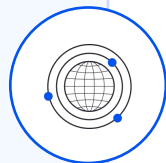

Global 24/7 Technical Support

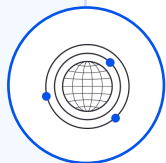

Technical Training & Enablement

Wiz Free Support – Self-service onboarding & adoption with on-demand assistance with 8x5 technical support and 4-hour initial response time.

Onboarding with Wiz

- Welcome to Wiz – Community Kickoff
- Champion center – self-onboarding
- Training & Community
- Need help? Reach out to support

Progressing with Wiz

- Champion center – self-adoption
- Monthly newsletter
- Community & Webinars
- Need help? Reach out to support

Maximize the **business impact** of your cloud security program

Transform
your security operations
for the cloud

“ Our DevOps teams log in directly to Wiz to identify and remediate issues, thereby scaling the Infosec team’s reach and velocity.

Melody Hildebrandt
CISO
FOX

 **Dev&Sec**
>55% of Wiz users
are developers

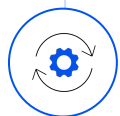

Rapidly Improve
your security posture

“ The cloud went from being our least understood to our most understood space, and that was entirely due to Wiz.

Greg Poniatowski
Head of Threat Management
MARS

 **5x better**
Improved visibility
and coverage

Operationalize
your cloud security
program

“ The Wiz platform is the consolidation of tools across all the security domains we’ve identified as must-do to protect our cloud workloads.

Adam Fletcher
CSO
Blackstone

 **10x Lower**
Effort to find and
remediate issues

Accelerate
your cloud initiatives

“ Our cloud journey is revolutionizing the company, so it is critical we can secure it. Security cannot be a blocker.

Jeremy Smith
VP InfoSec Officer
EVERY DENNISON

 **6 Months Faster**
Accelerate timelines
of business goals

Unprecedented
time to value

“ Within hours, we had the full power of Wiz. Nothing has ever matched that in terms of quick, painless deployment and no-maintenance after the fact. From the point of engagement to the point of ROI, it was easy to choose Wiz. We hadn’t even paid and already got results. Nowhere else was this process so fast.

Igor Tsyganskiy
President and CTO

Wiz Sensor Overview

Overview

The Wiz Runtime Sensor enhances threat detection by continuously monitoring and blocking threats in runtime and scanning for security risks on private infrastructure workloads. This runtime visibility enables teams to detect risks and threats across hybrid environment.

Use cases

- Cloud detection & response (CDR)
- Cross-layer threat detection and behavioral analytics
- Cloud Investigation and response automation (CIRA)
- Code-to-runtime mapping
- Forensics and incident response automations
- Cloud threat intelligence
- Identity detection and response (ITDR)
- Data detection and response (DDR)

Dexcom

Wiz enables us to combine the reactive and proactive aspects of cloud security in a single source of truth. We rely on the visibility that Wiz provides to surface the unknowns and provide actionable signals from noise, allowing us to prioritize our efforts. With the Wiz Sensor, we are adding active, real-time telemetry that gives my team intelligent insight to drive better actions.

Joel Cardella

Director, Cybersecurity
Engineering

Wiz Sensor Billable Units

Units are counted as a bundle of Wiz Defend and the Wiz Runtime Sensor. Defend Bundle billable units are based on the total monthly log volume ingested from your environment, measured in gigabytes (GB), and the number of deployed Runtime Sensors.

Wiz Go:

What is included?

Benefits of Wiz Go

- ✓ Secure your cloud from code to runtime
- ✓ Grow into any use case as needs arise & shift
- ✓ Transform into a mature cloud security program
- ✓ **All of this, within your budget**

Wiz Go includes

Wiz Cloud Advanced

300 Workloads

Wiz Defend

150 Ingestion Units (GB/mo.) + 150 GB free

Wiz Runtime Sensor

100 Sensors

Wiz Code

50 Active Developers

Qualification requirements
