Computacenter - Cloud Native Application Platform Review

SERVICE DESCRIPTION – CLOUD NATIVE APPLICATION PLATFORM REVIEW

OVERVIEW

Service Description

Our Cloud Application Platform Review is a high-impact consultancy engagement designed to bridge the gap between infrastructure stability and developer velocity. We conduct a deep-dive assessment of your existing implementation—whether it's Red Hat OpenShift, SUSE Rancher, Azure, AWS or OSS Kubernetes, analysing your ecosystem through the lens of Platform Engineering and Developer Experience (DevEx).

By evaluating your current state against CNAP best practices, we aim to identify bottlenecks in the software delivery lifecycle, examining how AI-assisted infrastructure and automated software deployment can remove manual toil. The goal is to transform your platform from managed infrastructure into a frictionless application platform that empowers engineers to go from code to production with minimal cognitive load.

This service is delivered via several workshops and discovery activities, with the tailored outputs presented back in a documented format that the customer can share and communicate with IT and business stakeholders.

Key Features for our Customers

- Cross-Platform Architecture Audit: A technical review of your specific distribution (OpenShift, Rancher, etc.) to ensure alignment with vendor and industry best practices
- CNAP Maturity Mapping: Benchmarking your environment against the Cloud Native Application Platform maturity model
- Platform Engineering Assessment: Evaluating the degree of self-service capability and infrastructure-as-code (IaC) maturity
- Security & Compliance Guardrails: Verifying that policy-as-code is enforced across the platform to maintain "secure-by-design" standards
- DORA DevEx & HEART Metrics Baseline: Establishing current benchmarks for software delivery performance, developer experience and platform success
- Roadmap & Recommendation Report: A comprehensive post-assessment report detailing immediate "quick wins" and long-term architectural evolution.

Key Benefit for our Customers

- Enhanced Platform Stability: Aligning with CNAP best practices reduces configuration drift and improves system resilience
- Faster Time-to-Market: Optimised deployment pipelines and AI assistance significantly shorten the lead time for new features
- Reduced Operational Costs: Identifying inefficiencies and over-provisioned resources leads to direct cloud savings
- True Self-Service Autonomy: Ensure tangible elimination of a ticketed fulfilment culture. Spinning up environments, databases, or preview links in minutes, not days
- Scalable Governance: Automated guardrails ensure compliance and security are maintained even as the platform scales.
- Vendor Interoperability: Ensure your platform strategy remains flexible, whether you are running on-premises, in the cloud, or at the edge.

SERVICE DESCRIPTION – SUPPORTING INFORMATION

Cloud & Applications services portfolio

Our Cloud Native Application Platform Review service forms part of Computacenter's Developer Velocity solutions.

These solutions help customers to scale software delivery by improving developer experience, adopting platform engineering and leverage AI assisted development.

SERVICE DESCRIPTION – SUPPORTING INFORMATION

Cloud & Applications services portfolio

Integral to our Advisory services, it forms part of our wider service portfolio aimed at support our customers at every stage of their technology adoption.

When leveraged with our Values Stream Mapping, Strategy & Roadmap, Technology Selection, and Proof of Value services, customers are able to take critical next steps in Cloud Native Application Platform adoption with confidence and clarity.

ORDERING & INVOICING PROCESS

Ordering Process

Please contact your Account Manager, call us on 01707 631000 or send an email to government@computacenter.com

Please ensure you reference the GCloud 15 Service ID number in all communication

Invoicing Process

Customers are invoiced monthly with 30 days net payment terms.

Computacenter Social Value and legal statements

Social Value Statement

Computacenter has a strong, long-standing commitment to delivering social value to the communities in which we operate. This is underpinned by our Sustainability Strategy, which focuses on the following 3 pillars:

- **People:** Supporting people and communities around the world
- **Planet:** Ensuring sustainable operations
- **Solutions:** Delivering sustainability through technology

While this strategy is in place across our global organisation, it aligns well to the 5 themes of the UK Government's Social Value Model and underpins our tailored approach to delivering social value through our government contracts in the UK. As a UK headquartered company and strategic supplier to UK government, Computacenter is proud of our strong track record in delivering social value within the UK specifically, but our global framework and reach provides us with opportunities to deliver social value on a much greater scale.

Our success in delivering social value through our global sustainability strategy is evidenced through the key recent achievements outlined below:

- TIME magazine has named Computacenter as one of the **World's Best Companies** where we have been recognised globally in three areas: employee satisfaction, revenue growth and sustainability (ESG). This highlights our commitment to our people, our planet and to delivering sustainable growth.
- The support we have provided to the Beyond Food Foundation through our joint '**Fresh Lives**' programme has included technology donations and funding to set up the programme as well as Computacenter employees volunteering their time to run CV and employability workshops. This is already having a demonstrable effect in reducing recidivism, with **60% of prison leavers** who take part in the programme gaining employment, with **86%** of those people still employed a year later.
- Our long-term carbon emissions reduction and net zero targets have been approved by the Science-Based Targets Initiative (SBTi) which, coupled with our A- rating from CDP for our latest Climate Change Survey disclosure demonstrates our strong commitment to fighting climate change and reaching **net zero emissions by 2050**.
- Our commitment to fighting climate change was further highlighted through our recognition as a Climate Leader in the Financial Times' Europe's Climate Leaders 2024 report, where we ranked **16th overall, 3rd of all UK-based organisations** and **1st in the UK technology sector**.
- Ecovadis have recognised our overall ESG performance by awarding us a silver rating at a global level, placing us within the **top 8%** of all organisations assessed
- We have been recognised as a 'Top Employer' by the Top Employers Institute for the last 2 years as being one of the UK's best places to work, as well as further recognition through our [Great Place To Work certification](#).
- Our people-led **Ethnic Diversity Employee Impact Group** has been nominated in the category of 'Network Group' in the 2024 Ethnicity Awards from Investing in Ethnicity, demonstrating our strong commitment to championing ethnic diversity within our organisation and the wider industry.
- Computacenter were highly commended in the CRN Sustainability in Tech Awards 2024 in the **Circular Economy Company of the Year** category.
- In 2025, Rate my Apprenticeship and the Department for Education recognised Computacenter as a Top 100 employer for apprenticeships.

Legal Statement
