Lot 3 Pricing Approach

This document describes the pricing approach for Lot 3 services offered under the G-Cloud 15 Framework. It should be read in conjunction with the Lot 3 pricing information entered on the Digital Marketplace.

Pricing model

Lot 3 services are normally delivered on a fixed-price basis. Fixed prices are agreed with buyers at call-off, based on the agreed scope of work, the nature and complexity of the services required, and the roles involved.

Relationship to published day rates

The day rates published on the Digital Marketplace represent the maximum rates that may be charged under the framework. All fixed prices are derived using these published day rates as a ceiling. The implied day rate of any fixed-price engagement will not exceed the relevant published rate.

Alternative pricing arrangements

Where appropriate and by agreement with the buyer at call-off, services may also be provided on a time-and-materials basis using the published day rates.

General notes

Pricing is agreed at call-off.

No minimum volumes or commitments apply.

All pricing complies with the G-Cloud Framework rules and the Call-Off Contract.
