Managed Data Platform Service

Small Data Platform Scenario

- › 1 production environment
- › 20 pipelines
- › 5 compute instances
- › 3 functions
- › 2 integration runtimes
- › 5 CI/CD pipeline runs per week

Service Features	Monthly Price
Core Service Features	
Monitoring & Alerting	£1.4k
Optimisation Reporting	£1.3k
Platform Administration	£436
Backup & Disaster Recovery	£432
Optional Service Features	
Change Release Management	-
Data Engineering as a Service	-
Data Catalogue Management	-
Total	£3.6k

Managed Data Platform Service

Medium Data Platform Scenario

- › 1 production environment
- › 250 pipelines
- › 10 compute instances
- › 5 functions
- › 3 integration runtimes
- › 15 CI/CD pipeline runs per week
- › Change Release Management: 4 hours per month
- › Data Engineering as a Service: 15 hours per month
- › Data Catalogue Management: 20 curated tables + 30 catalogue users

Service Features	Monthly Price
Core Service Features	
Monitoring & Alerting	£3.9k
Optimisation Reporting	£1.3k
Platform Administration	£435
Backup & Disaster Recovery	£1.0k
Optional Service Features	
Change Release Management	£348
Data Engineering as a Service	£1.6k
Data Catalogue Management	£871
Total	£9.5k

Managed Data Platform Service

Large Data Platform Scenario

- › 2 production environment
- › 500 pipelines
- › 30 compute instances
- › 20 functions
- › 7 logic apps
- › 5 integration runtimes
- › 35 CI/CD pipeline runs per week
- › Change Release Management: 20 hours per month
- › Data Engineering as a Service: 38 hours per month
- › Data Catalogue Management: 50 curated tables + 250 catalogue users

Service Features	Monthly Price
Core Service Features	
Monitoring & Alerting	£12.8k
Optimisation Reporting	£2.2k
Platform Administration	£871
Backup & Disaster Recovery	£3.3k
