Pricing

Software Services – £125,000 / year

Onboarding Accelerator – £12,390 One Time Fee*

* Cloud Accelerator - For all new projects on the Digital Experience Platform, the Cloud Accelerator package is designed to increase working knowledge around Optimizely's Digital Experience Platform (DXP), and related as-a- service products, and to provide an accelerated platform for implementations using the Digital Experience Platform. The package includes a technical overview for configuration and development within the cloud; cloud implementation support; and a pre-launch certification checklist - all tools to help bridge technical and operational gaps and to ensure a firm onboarding process. The cloud technical overview and implementation support includes the setup and configuration of Azure Web Apps specific to Optimizely DXP, an overview of code deployment, authentication, Digital Experience Hub (DXH) web services and 3rd party connectors. The Cloud Accelerator helps establish consistent development and deployment processes aligned with platform capabilities and operational structure, ultimately ensuring solutions are realized on a solid foundation.
