

Test & Devops Factory On Demand

Test & DevOps Factory On Demand

Service Description

- The Test and DevOps Factory provides qualified software engineering professionals, frameworks and technology as an "On Demand" service.
- Our professionals cover all quality engineering processes and can take ownership of your entire delivery or complement your existing teams.
- We can provide architecture, testing and DevOps personnel on a time and materials or fixed price basis as required, either on site or remote.
- We will agree with you the appropriate tooling for the activity with us managing tool procurement and licensing in the most cost-effective manner.
- You simply decide which tools you require – we can advise based on your requirements - and we will provision and support it for you on demand, as and when you need it. Open Source or Enterprise tools can be provisioned as SaaS on the Cloud or be installed on-premise - the choice is yours.

Service Features

- People and tools are matched to the system(s) under test
- The client does not need to provide any test tools
- All maintenance of the test tools is managed by Infuse
- Flexible resourcing to address demand spikes
- A pre-built Centrr of Excellence Model
- Support Test Automation and DevOps initiatives
- Support Salesforce, Oracle, SAP and other packaged applications

Business Benefits

- Fast results with fixed price SaaS model, with no CAPEX
- Remove bottlenecks in the test process due to incumbent issues
- Eliminate the need for expensive test tool infrastructure
- Scale testing resources up or down based on demand
- Reduces the time-to-market
- Extensive standardisation and automation, delivering lower costs

Why Infuse ?

Experience and Credibility

Established in 2002 with over 21 years of experience in software delivery and quality engineering consulting having helped successfully deliver over 500 projects around the globe.

Higher Education Specialists

We have successfully deployed test services on over 35 HEI clients so we understand your business drivers and ways of working. We have experience with systems such as Moodle, Tribal SITS, CourseLoop, SAP and have delivered services ranging from functional test delivery to test automation, performance testing, test environment management, and process optimisation.

Multi-disciplinary Team

We leverage experts across our practice to provide you with an end-to-end delivery capability from experienced test managers to scrum masters, agile coaches, architects, developers, and manual & technical testers.

Test Expertise & Team Integration

All our resource are ISTQB foundation certified and bring expertise in testing together with experience and energy to quickly integrate with your existing team. We have a history of enhancing existing test teams to accelerate progress and are comfortable delivering within and managing a mixed team including in-house, contractor and third-party resource.

Highly Motivated & Delivery Focused

Our team are highly motivated and delivery focused, and will go above and beyond expectations to ensure the successful delivery of the test workstream. We have demonstrated our commitment to success on numerous previous test engagements.

Competitive Delivery Model

We effectively deploy resource onsite, onshore and offshore on many of our engagements. Our experience of delivering from multiple locations provides you with a cost competitive proposition together with the ability to flex resource when required.

Technical Innovation

We have expertise across a wide range of innovative products from our own script-less test automation tool – useMango™ – to leading enterprise and open-source tools, through to our delivery accelerators.

Company Overview

Who We Are

- We are a team of 100+ engineers and consultants spread globally with a passion for modern software design, engineering and delivery.
- We possess deep expertise across Architecture, Agile, DevOps, Cloud Transformation, Quality & Performance Engineering.
- Since 2002, we have been helping companies of all sizes design, develop and deploy high quality software.
- Since 2018, we have been focused on supporting HEIs resolve their technology challenges as part of their digital transformation and cloud migration agenda.
