

Cloud Migration, Modernisation Discovery and Assessment Service

Our Business Led Transformation Framework

We believe that all IT investments must start with a deep understanding of *business*, before considering *application*, *data* and *technology domains*. We provide a structured process leading from business and current state understanding through options ideation to a robust prioritisation approach that focuses on *business outcome delivery*.

Core Principles

**Business Led

How can our Discovery & Assessment service help your business?

Thorough Discovery provides visibility and insight previously lacking

- Combination of automated tooling and customer engagement ensures a comprehensive inventory can be established
- Business knowledge, such as criticality and classification, is overlayed with technical detail such as network dependencies and Cloud cost consumption estimates at a granular (application and server) level

Collaborative approach to Assessment

- Applications and servers are assessed against the “Rs” (rehost, re-platform, refactor etc.) to establish future hosting requirements, be that Cloud hosting, SaaS, or on-premise
- Each assessment is discussed and agreed with customer prior to roadmap and associated plan being produced

Detailed and clear deliverables detail findings and next steps

- Discovery and assessment findings are provided in a detailed report
- Cloud adoption roadmap is charted in a high-level project plan showing suggested approach for agreed migrations
- Project and Cloud consumption cost estimates provided
