

Application and Platform Integration Services

Powered by
Evolve

Connecting systems across your organisation

Your systems are more heterogenous than ever. Integrating these effectively can be challenging but is key to driving maximum value from your investment. We have extensive experience across multiple technologies and sectors and can advise on and implement your integration needs.

Integrated Apps

SaaS and product integration

Integrating product and SaaS into the fabric of your organisation

API development and orchestration

Harnessing the power of APIs to empower business capabilities

Modernising legacy middleware

Helping customers replace legacy middleware solutions using open standards and modern best practices

Identity and access management

Providing IDAM and SSO solutions to enable effective system integration

Multi hybrid cloud integration

Enabling your multi and hybrid cloud requirements

IoT and edge computing

Connecting the edge to the core of your business

Enabling Apps Which Are..

Secure By Design

Resilient
(Scalable & Highly Available)

Supportable
(Monitoring, Reporting, Observability)

Cost Effective
(Licencing & FinOps)

 **VERSION 1**

Application Integration

Application Integration links the **behaviour** of different applications so that a technology solution, comprising multiple individual applications, can operate as one system.

- For real-time integration, this is typically done using technology agnostic APIs or deeper, technology specific interfaces.
- For near-real-time integration, this is typically done using Event-driven architectures.

Our Application Integration Technology capability

- ✓ Azure APIM
- ✓ Azure Service Bus
- ✓ Azure Event Grid
- ✓ Azure Logic Apps
- ✓ Azure Functions
- ✓ Microsoft Biztalk
- ✓ Microsoft WCF

- ✓ API Management
- ✓ Event Bus
- ✓ SNS /SQS / MQ
- ✓ Lambdas
- ✓ AppFlow
- ✓ Step Functions

- ✓ Oracle Fusion Middleware
- ✓ Oracle SOA Suite
- ✓ Oracle Service Bus (OSB)
- ✓ Oracle Integration Service (on OCI)

- ✓ Red Hat 3scale
- ✓ Red Hat AMQ
- ✓ Red Hat Fuse
- ✓ Red Hat Jboss EAP

Data Integration

In the context of Integrated Apps, *Data Integration* links the **data** of different applications so that a technology solution can operate as one system. This is done by either moving, and transforming, the data between applications or allowing one application to 'see' or reference the data from another application.

Our Data Integration Technology capability

- ✓ Azure Data Factory
- ✓ Azure Service Bus
- ✓ Azure Event Grid
- ✓ Azure Synapse Analytics
- ✓ Azure Logic Apps
- ✓ Microsoft SSIS

- ✓ AWS Glue
- ✓ AWS Q
- ✓ Amazon Redshift
- ✓ Amazon Kinesis
- ✓ Amazon MSK
- ✓ Amazon Aurora

- ✓ Oracle Data Integrator (ODI)
- ✓ Oracle Data Integration Platform Cloud

- ✓ Red Hat Data Grid
- ✓ Red Hat Fuse
- ✓ Red Hat AMQ

Integrated Security Approach

Our Version 1 security approach is agile, iterative, and risk-based, factoring in our experience and scale from across our customer engagements.

Integrating Cloud Services

Public Cloud for the Public Sector

Highly-Automated

- Automation drives out manual and repetitive tasks
- Reduces human error
- Allows engineering and operations to focus on higher value tasks

Self-Service

- Internal marketplaces allow stakeholders such as developers or projects spin up services from a pre-defined catalogue
- Add, Amend or Delete Catalogue items
- Integrated with your ticketing, customer service platform

Traditional Enterprise Cloud Models

- IaaS - IT infrastructure and operations
- PaaS - Digital Transformation for technologists and developers
- SaaS - Applications for businesses or business units

Regulatory Compliance

- Regulatory compliance is built into the guardrails of the cloud
- Policy is codified wherever possible
- Harnesses underlying compliance of the cloud provider

Delegated / Federated

- Environments can be delegated or federated inside the organisation
- Pre-defined guardrails ensure operation within controlled parameters
- Empowerment of the wider organisation

Intelligent

- Utilises AI and Machine Learning to the benefit of the customer
- API driven
- Industry aware

Composable

- Improves adaptability to changing business needs
- Reduces cost and increases time to market
- Uses principles of composability

Best Practices

Information Security Management System

Version 1 recognise that the relationship between information security and IT service management is so close that we implemented an Integrated Management System (IMS) that has been certified to ISO 27001:2013 and ISO 20000-1:2011 with matching scopes. Version 1 is also certified for Cyber Essentials Plus.

The Version 1 IMS is based on the guidance provided in the International Standard for the Corporate Governance of IT (ISO/IEC 38500) and the International Standard for Risk Management (ISO 31000).

The Version 1 IMS is audited every 3 months, alternately by internal and external auditors. An Information Security Officer along with the IT Governance Committee are responsible for maintaining the IMS, as well as providing advice and guidance on policy implementation

Powered by Evolve.

Our Business Led Transformation Framework

We believe that all IT investments must start with a deep understanding of *business*, before considering *application*, *data* and *technology domains*. We provide a structured process leading from business and current state understanding through options ideation to a robust prioritisation approach that focuses on *business outcome delivery*.

Core Principles

Business Led Tx

Relentless Focus on Business Value

Release Value Quickly

Apply User Centred Design

Continual KPI & Outcome Measurement

Why Evolve?

Combine technical needs and challenges with tangible business goals and objectives.

Business Driven

Drive Actions

Define and measure success, understand the critical path and the priorities that realise your objectives.

Setup for Success

Ensure your transformation is sustainable and at a pace that you can absorb

Informed & Insightful Decision Support

Surface the information and data you need for informed decision making. No more guessing.

Deliver Value, Early and Often

Value prioritisation - Identify where the value lies, how to realise that and how to get there.

Innovate and Differentiate

Access breadth and depth of innovation experience across industries and sectors to accelerate change.

Benefits of our Integration Solutions

Solution & Partner Agnostic

With deep expertise across three Public Clouds (Oracle Cloud, Microsoft Azure & Amazon Web Services), we provide impartial advice based on your needs

Integrate Everywhere

We have experience and expertise in on-premise, cloud, hybrid and multi cloud integration solutions to cater for every need

Open Standards

We ensure interoperability and enable vendor neutrality by aligning to open standards by default.

Modernise Legacy Integration solutions

We can help you modernise and employ best practice integration platforms to enable your current and future integration requirements.

Unlock the value of your data

Exploit and protect your existing data locked in silos through our data integration capability

Proven UK Public Sector experience

We've delivered integration solutions for multiple UK public sector customers and understand your unique needs and considerations

Secure By Design

Our templated integration solutions employ Secure By Design principles to ensure we protect your applications and data using modern best practice solutions

True Partnership

We work in collaboration with your team and suppliers to own issues and drive them to resolution.

Ability to Scale Quickly

We have a strong track record and understanding of how to quickly scale SC cleared teams to deliver on your integration needs

About Version 1

Version 1 at a glance

29 years of experience

13 global locations

6 strategic technology partners

13 years as a great place to work

Industry best practice

€364M+ revenue 2024

82% employee engagement score (Q2 2025)

85% customer satisfaction score (Q2 2025)

The Version 1 difference

The core values at the heart of Version 1's success.

**Honesty and
integrity**

**Personal
commitment**

No ego

Customer first

Excellence

Drive

Looking forward: Our ESG targets, goals & achievements

A-

score for Carbon Disclosure Project reflecting our sustainability practices (Industry average is a C)

680+

Volunteering hours delivered by employees globally

80%

key suppliers with sustainability targets by 2025, we are committed to reducing environmental impacts across our supply chain through responsible sourcing and partnerships

217

Version 1 Impact Investors supporting our global Community First programme which aligns to the UN Sustainability Development Goals

Bronze

Ecovadis rating reflecting our ESG maturity across our strategic focus areas

930

Women in Tech members

Our four strategic ESG pillars:

**Environment
sustainability**

**Ethical
Practices**

**Responsible
Procurement**

**Social
Impact**

As a participant of the United Nations Global Compact, Version 1 is committed to aligning strategies and operations with universal principles on human rights, labour, environment and anti-corruption

Our services portfolio

Application Modernisation and Integration

Accelerating the modernisation of applications embracing sustainable engineering and AI-assisted development.

Legacy systems modernisation

Continuous modernisation

Next Gen Apps

Integrated Apps

Portfolio modernisation

Experience Design and Development

Designing, shaping and building products and solutions that deliver fantastic people and societal experiences.

Digital strategy and innovation

Product management and roadmaps

Behavioural research, analysis and journey mapping

Creative design and UX services

Product development and AI accelerated engineering

Envisioning and innovation workshops

Enterprise Applications

Optimising the core of your business with deep functional and technical expertise in Finance, People, Customer and Enterprise Performance Management (EPM).

Reshaping finance for the future

Elevating HR and people operations

Enhancing supply chain management

Amplifying customer touchpoints

Realising value with Data insights and AI

Data x AI

Becoming an intelligent, data driven organisation needs quality data x AI to make better decisions and processes.

Data strategy and architecture

Data engineering

Data analytics and visualisation

Data modernisation

Data governance

AI co-creation services

Cloud Transformation

Adopting, optimising and leveraging Cloud to unlock new or enhanced business value and innovation.

Industry specific cloud

Readiness and enablement

Migration and transformation

Operate and optimise

Specialist services

ASPIRE Managed Services

Reduce time, cost and risk by leveraging our VLA approach to run and optimise traditional and Cloud services to improve business agility and accelerate innovation.

Cloud and infrastructure management and optimisation

Oracle SaaS management and optimisation

Data and AI managed services

EBS, Peoplesoft and JDE managed service

Application management and optimisation

Digital workplace services

Our global technology partners

- Named **AWS Collaboration Partner of the Year 2024**
- Named **Global Microsoft Modernising Applications Partner of the Year Award 2023**
- Named **Microsoft Ireland Partner of the Year 2023 Winner - Social Impact**
- Named **Innovation Partner of the Year Winner - 2023 Oracle EMEA Partner Awards**
- Named **AWS Collaboration Partner of the Year - EMEA 2023**
- Named **AWS Migration Partner of the Year - EMEA 2022**
- Named **OutSystems Partner of the Year 2021**

Microsoft Partner

Azure Expert MSP

As an Azure Expert MSP and the Global Modernising Applications Partner of the Year 2023, Version 1 boasts extensive expertise across the Microsoft stack.

Premier
Consulting
Partner

An AWS Premier Consulting Partner and EMEA Migration Partner of the Year, Version 1's unrivalled expertise boasts deep expertise with 400 certifications and accreditations.

With 28+ years of Oracle ecosystem expertise, we're a certified Oracle Modern OPN Partner and Cloud Solutions Provider - One of Europe's most distinguished Oracle Cloud partners.

As a Premier Red Hat partner, we are experts in hybrid-cloud models and OpenShift, recognised for driving innovative solutions using Red Hat technologies.

An OutSystems Partner for Sales, Delivery and Quality Apps Program Partner, Version 1 is committed to unlocking value for our customers through low code development.

As a Snowflake Partner Version 1 enables customers to leverage Snowflake's flexibility, performance, and ease of use to deliver more meaningful data insights.
