Oracle SaaS Managed Service

Client challenges

“How do I ensure the ongoing training and development of my inhouse team from an outdated partner?”

Version 1's ASPIRE Oracle Cloud SaaS Management and Optimisation Services can be tailored to deliver a flexible 'best-shore' model with knowledge sharing at its core.

“How do I ensure innovation within my managed service and not just 'break/fix'?”

The ASPIRE Oracle Cloud SaaS Management and Optimisation Services measures Value Level Agreements (VLAs) based on your business outcomes and not just hitting service KPIs.

“How do I ensure simplicity in my environment and return on investment?”

Version 1 advocates adopting the system and adapting your processes to ensure that the deployment of releases are as smooth as possible.

Client challenge leveraging your investment

Buying a SaaS solution gives you access to the latest updates and enhancements to your business processes, but only if you have the delivery framework to support their review and implementation. If this is not in place, then regardless of the investment you have made, your processes will quickly become out of date.

ASPIRE framework with Oracle SaaS Managed Services

LEVEL 1, 2, 3, 4 SUPPORT ACROSS YOUR ENTIRE ORACLE STACK: SAAS, PAAS AND IAAS

Tooling | Maximise efficiency and user experience

ServiceNow integration

- Bi-directional integration and operating in real-time.
- Dashboards for monitoring KPIs over wide range of metrics.
- Enhanced reporting, including additional custom data.

OpsView event monitoring/management

- Version 1 standard monitoring tool for IaaS and PaaS.
- Integrates with ServiceNow with automated ticket logging.

Automated testing

- Fully automated regression testing for ERP and HCM cloud.
- Runs on a dedicated workstation.
- View test results through Engage dashboards.

Optimisation and adoption

- Cloud roadmap assessment.
- On-site quarterly health check.
- Knowledge transfer.

Business continuity

- Environment management.
- Impact assessment.
- Test planning.
- Regression testing.

Value Level Agreement | With ASPIRE, SLAs are a given

ASPIRE Managed Services Value-Level Agreements (VLA)

A VLA is a meaningful key performance indicator that directly impacts your business's bottom line and can be quantified, measured, and reported on.

The key difference between ASPIRE and traditional managed services lies in how we measure service success, not only by hitting SLAs around resolution and response times but also by delivering tangible 'value adds' to your business – we call them **VLAs** or **Value Level Agreements**.

These all help with the continuous service improvement across your systems and are measurable and reportable.

With ASPIRE, SLAs are a given

Our client Value Level Agreements

What **your** VLA looks like depends on **your** unique needs.

Customer problem	What Version 1 delivered	Positive impact
Client's payroll team had to manually enter RTI Starter Declaration details from information supplied by new joiners on a paper form.	We proposed using the seeded self-service RTI Starter Declaration functionality to have employees enter the required data themselves as part of their onboarding process.	Significant time saving to the client's payroll team. Estimated reduction in time by not having to manually key the data was around 0.5 to 1 day per month.
Client wanted a solution to control the requesting of learning. They have an obligation to follow Cabinet Office procurement procedures, with their current solution they were not compliant.	A journey which incorporates rules which trigger different tasks depending on the level of spend and the department that the requester is in. The data entered determines what the next step in the process is.	Client is now compliant with Cabinet Office procurement rules and processes. Additionally, it adds control and ability to report on the data. Finally, it has sped up the requesting process and removed significant manual intervention.
Client needed to improve their procure-to-pay process and allow for requests to be raised on behalf of the requester.	A combination of new approval rules, creation of a customised role and additional roles assigned to users along with some new scheduled processes which removed manual work.	Client now utilises best practice in the system and the overall 'procure to pay' business process is improved.
Client wanted a one-stop shop for all approvers to be able to see all outstanding approvals in one place.	Implemented Oracle Digital Assistant (using OOTB Approver Skill) to facilitate this with no additional license costs.	Users (including busy senior users) can now see and action all their outstanding approvals from one place - with potential to extend functionality to Teams/mobile device.

Our key focus areas for your Managed Service

| Optimisation and adoption

Cloud roadmap assessment

- Review all available updates of relevance to business' priorities.
- Development of roadmap.
- New feature recommendations.
- Configure, test, and implement optional new features.

On-site quarterly health check

- Incident trend analysis.
- Quarterly on-site consultancy day.
- Process reviews.
- Recommendations report.

Knowledge transfer

- Informative new feature webinars.
- Recommendation papers and new functionality walkthroughs.
- Underutilised functionality awareness.
- Training packs.
- Onboarding new starters.
- Training for new processes and modules customisable training and enablement options.

| Business continuity

Test planning

- Define the scope of regression testing.
- Create test plan (environments, sequence of tests, test data, etc.).

Environment management

- Co-ordinate refreshes with Oracle.
- Pre and post release steps.

Impact assessment

- Provide tailored impact assessments across all modules
- Tailored webinar covering mandatory and
- Non-mandatory updates.

Regression testing

- Manual and automated testing across key business areas including integrations.
- Identify, log, and resolve defects.

Drive efficiencies with automated testing

Version 1 has developed a robust and comprehensive automated testing tool for the following:

- Streamline testing cycles and reduce manual effort.
- Minimise the risk of interruption or impact of the quarterly release cycle on organisations.
- Enabling you to focus on the benefits the updates provide.
- Reduce testing effort required for cloud quarterly releases:
 - Run regression testing
 - Review results
 - Raise any issues identified with Oracle
 - Repeat testing once fixes available
- Automated testing can be more extensive and thorough than manual.
- Add additional test cases without increasing user workload.

Oracle SaaS Managed Service model pick and mix

Version 1's fully customisable model invites you to select from a comprehensive range of services.

Our flexible model can fulfil your unique requirements, whether you need to compliment your in-house resources or put in place a fully outsourced offering.

Core ASPIRE MS as a Service

- Level 1 sys admin and triage support
- Level 2/3 functional and technical support across all CEMlis and modular footprint
- DBA support, cloning, patching and proactive monitoring
- Azure/OCI support/AWS infrastructure support
- Problem management and P1 root cause analysis
- Incident management and request items
- Unit testing for one-off fixes provided by oracle
- Default hours 08:00 - 18:00 (service desk 24*7*365)
- Monthly service reviews - onshore service delivery and account manager
- Manage oracle service requests and escalations

ASPIRE MS as a Service

- PaaS extension and integration - maintenance and enhancement
- Reports maintenance and development
- Flexible service level agreements
- Customised value led agreements
- Complete small changes
- One stop shop for all 3rd party suppliers
- Onsite support for key process (e.g. Month end)

Training and enablement

- Informative new feature webinars
- Training packs for new starters
- On-site/remote training for new processes and modules
- Customisable training and enablement options
- 'how to' guides
- Access to knowledge base

Quarterly rhythm

- Quarterly health checks
- Cloud roadmap management
- Environment management
- Customised impact assessment
- New features walkthrough
- Automated/manual regression testing including defect resolution/Oracle SR management
- Pre and post patching steps
- Mandatory change configuration

Innovation and value add

- Artificial intelligence
- Blockchain
- Robotic process automation
- Automated testing
- Chatbots
- APEX extensions
- Licensing review

Optimisation and adoption

- ERP roadmap aligned to business priorities
- Incident trend analysis
- On-site process review
- Recommendation paper and walkthrough
- Underutilised functionality review (new feature adoption)
- Annual ERP assessments
- New module review

Customisable support

- Fixed price annual fee
- Tickets per month/year
- Onshore, nearshore and offshore models
- Onsite and offsite model
- Drawdown days
- FTE-based service
- 24*7*365 / emergency / out of hours support

Deeply experienced in provision of Oracle ERP Managed Services since 1996.

Exclusively focused on Oracle ERP, we do not work with any other ERP.

Recognised by Oracle user community as UKOUG Gold Partner of the Year for Managed Service (both applications and technology).

An established Oracle Partner and member of Oracle’s Cloud Program, we are in constant contact with Oracle to drive resolutions for our customers.

ASPIRE Oracle SaaS Managed Services Client testimonials

“

“The support we’ve received since moving back to Version 1 in October 2022 has been excellent. They provide both in depth technical knowledge and also the ability to work with us to understand our business needs and translate that into the art of the possible and identify the solutions available to us to deliver on those needs. This is an aspect that was missing in our previous support contract and the move to Version 1 has delivered positive benefits and given us a partner with knowledge of both the sector and the area, who cares about our organisation and priorities.”

Head of Finance | Technical and Transactional

“

“We needed a partner to help us adjust and transition to BAU but also someone who would help us to evolve our configuration as our organisational needs change.”

Birmingham City Council

“

“Version 1 was our partner in delivering Oracle Fusion ERP solution. Our aim was to replace legacy Finance, Procurement, Fixed Assets and Payment applications with a single solution. Overall, the implementation went smoothly and was completed under budget which was a great achievement given the size and complexity of the system and project.

Our approach was to “Adopt not Adapt” – Version 1 helped us reach that goal using the full configuration capabilities of Oracle Fusion with no custom development required. Moving to Oracle Fusion ensures future upgrades are completed with minimal disruption and maintenance costs should be kept to a minimum. Version 1 provided a structured and methodological project approach with any issues or changes being turned around in a timely manner.”

IS Manager at Belfast Harbour Commissioners

Why is Version 1 different? Our key differentiators

1. Scale and critical mass

With over **150 dedicated Managed Services consultants**, our teams are well resourced and managed with the right levels of skill and Oracle expertise.

2. Stability

We have some of the lowest attrition rates in the industry. Being voted **the best company to work for in multiple countries** over the last decade has given us an unparalleled reputation in the market allowing us to provide a stable service.

3. Partnership

We are in the business of creating **long term relationships based on shared values** and have proposed a solution to your service requirements that will deliver this at all levels of the organisation.

4. Innovation

Beyond just break-fix and SLAs: We measure service success not only on hitting SLAs around resolution and response times but also on tangible 'value adds' to our customer's business – we call them **VLAs or value level agreements**.

5. Best shore resource

We operate a **"best-shore" policy** when selecting and deploying services from various locations.

6. Flexibility

Our flexible commercial model means you are charged based on **ticket numbers** and not days or hours, giving certainty over your expenditure.

Our Oracle Managed Services capabilities

 250 EA Managed Service consultants	Follow ITIL best practice ISO20000 certified	 100+ seamless transitions	Full support across all Oracle modules (SaaS, IaaS, PaaS)	 100+ EA Managed Service customers

How our services address these concerns

Typical client concerns

- Tools and application updates twice a year, ensuring your application stays current.
- Gain access to the latest JDE features from Oracle's quarterly and annual releases.
- Specialist JDE resource across technical, functional, business analyst and project manager roles.
- JDE resource evolves into an extension of your in-house team for optimal collaboration.
- Help and advice is readily available from our dedicated team.
- Proactive Configurable Network Computing (CNC) Managed Service centre ensuring your system is kept at optimum performance 24 hours a day.
- Manage and minimise business impacting outages and issues.

Version 1 JD Edwards Managed Service

"How do I stay code current to get the best results from JDE available continuous innovation?"

"How do I access specialists across the breadth of JDE without employing an army of people?"

"How do I insure against outages when my business operates 24/7?"

- Tailored and customer centric summary on features and functionality that are relevant to your EBS environment and/or of interest to you.
- Consolidation of Oracle release documentation that includes any resolution to your specific pain points, helping you to decide on whether there is value in upgrading.
- DBA health check - our team can identify performance tuning recommendations and issues with database passwords.
- OCI health check - our team can uncover cost optimisation opportunities to reduce ongoing consumption costs.
- Implementation of single sign on simplifying log in and user experience resulting in resource savings for internal IT teams.
- Audit and governance around the creation and disabling of users.

Version 1 Oracle EBS Managed Service

"How do we know whether there are benefits in completing an EBS point upgrade?"

"How can a DBA or OCI health check benefit me?"

"Can you simplify Oracle sign on?"

- 24/7 application, database & infrastructure monitoring with automated incident reporting.
- Team of PeopleSoft experts ready to respond to and resolve incidents.
- Application modernisation & upgrades to keep PeopleSoft up to date & supported.
- Option to augment your team or outsource various components of the support.
- Wealth of senior PeopleSoft specialists, many with 20 years' + experience.
- Functional and technical expertise.
- Broad knowledge of the PeopleSoft estate covering all modules.
- Current application functionality expertise.
- Full analysis of all patches & their potential impact to your solution.
- Application of operating system & database patches.
- Application of quarterly Oracle CPU patches on a schedule that we agree on.
- Application of emergency updates under an agreed SLA.

Version 1 PeopleSoft Managed Service

"PeopleSoft is vital to our business. How do we ensure its availability?"

"We are finding it difficult to maintain PeopleSoft internally, can you help?"

"How can I keep my PeopleSoft estate safe from cyber-attacks?"

- Support coverage can reduce and flex over the life of the contract.
- Changes in support coverage aligns with the continual development of your in-house team's skills.
- Information and knowledge transfer between the Version 1 team and your in-house resource on new features and/or capabilities.
- Industry leading technologists continually innovate around your specific business objectives.
- Easily applied quarterly release pattern without any complexity and disruption to service.
- Implementation of any new features at a minimal operational cost and maximum ROI.

Version 1 Oracle SaaS Managed Service

"How do I ensure innovation within my managed service and not just 'break/fix?'"

"How do I ensure the ongoing training and development of my inhouse team from an outsourced partner?"

"How do I ensure simplicity in my environment and return on investment?"
