

Digital Business Analysis for Cloud

Digital Business Analysis for Cloud - Overview

Version 1's Digital Business Analysis for Cloud service is a broad, flexible and comprehensive service to support organisations deliver robust change through better understanding of the needs and requirements of the organisation and users prior to any move to a cloud based solution(s)

- Our Digital Business Analysis for Cloud service has been successfully deployed to a wide range of public and private sector clients.
- We have supported organisations to identify and test new ideas;
- Design new services;
- Build business cases for making change;
- Define and review new digital strategies.

We are experts in identifying and capturing user stories and requirements - enabling you to meet the needs of users and the business in an efficient and effective manner. The analysis and recommendations from the service can support your business when taking forward digital projects or services and can support senior stakeholders in taking major decisions about the future direction.

- Our Digital Business Analysis for Cloud service is fully customisable,
 - From your business goals,
 - The size, skills and experience of our team,
 - The length of our deployment

Understand the Organisation

Clarify goals, needs and cloud readiness.

Explore Ideas & Opportunities

Identify, shape and test new concepts.

Define Services & Requirements

Capture user needs, requirements and stories.

Support Strategic Decision-Making

Evidence for business cases and digital direction.

Flexible, Scalable Deployment

Tailored to goals, skills and timeline.

Digital Business Analysis for Cloud – Our Approach

Prior to formal engagement

- Before any formal engagement takes place we like to meet with our potential clients to develop an understanding of what they are trying to achieve and how we could help. We find that this allows us to add value from the outset and ensure that expectations are clear.

Formal engagement and start-up

- At the outset of the engagement we agree the scope of the work, based on the proposal which may have been revised iteratively during the prior stage.
- “Kick-off” meetings with the client and key stakeholder to ensure everyone is clear on the plan and their roles and responsibilities

During the engagement

- We work closely with clients to keep them informed and involved, adapting our approach based on the nature of the engagement.

- Whether operating independently or as part of an existing team, we ensure seamless collaboration and knowledge and skills transfer throughout the process.
- We hold regular catch-up meetings with the client and key stakeholders to share progress updates and maintain alignment. These sessions provide an opportunity to address unforeseen challenges, clarify priorities, and make any necessary adjustments to ensure the engagement stays on track.

At the end of the engagement

- We present the completed deliverables to the client for sign-off and can provide a summary report outlining results, progress, key risks, lessons learned, and recommendations for next steps. Throughout the process, we prioritise knowledge transfer so clients are empowered, and we conclude with a review of outcomes and methods to strengthen the client team for future challenges.

Digital Business Analysis for Cloud – Outcomes

Here are some of the ways in which our clients say they have benefited from our services. We can provide further details about these benefits upon request, and some are included in the case studies on our website

- Improved Efficiency and Responsiveness
 - Quicker and higher quality response to business needs
