

Testing Services

Testing Services

Enhance, Transform, Succeed

Test as a Service is Version 1’s model for partnering with customers, ensuring standardisation and business continuity in test capability. We combine a risk-based testing approach with AI-augmented testing to focus effort where it matters most, prioritising business and technical risks across multiple government agencies, including HMCTS, HMPPS and Home Office.

Our holistic, context-driven approach brings often-overlooked non-functional requirements (NFRs) such as monitoring and logging to the forefront across incident resolution, enhancements, feature development and live-service support.

With a strong automation-first ethos and AI-driven optimisation, we rapidly assess risks, validate requirements and ensure compliance with standards (OWASP, WCAG 2.2 AA). AI-powered tools enhance test automation, detect recurring failures, and enabling faster delivery and improved quality. Backed by targeted exploratory testing, we expose risks early for efficient mitigation

Our Testing Approach :

What we can deliver

With Version 1 our customers can engage with us from everything from outsourcing all your testing into a Managed Test Service down to resource augmentation.

The services we offer are:

Automation First Functional Testing

Version 1 Test Automation ensures the right checking is done in the most efficient way, using our open-sourced framework. We will change the way you think about automation, moving from low value high quantity of UI tests to high value targeted tests at the right level (API, Unit, UI). We enhance this approach with AI-assisted testing to optimise test coverage, intelligently prioritise scenarios, and reduce maintenance effort. AI-driven capabilities such as visual regression analysis help identify and resolve recurring failures faster, improving resilience and accelerating delivery.

Benefits

- Checking integrated into CI/CD pipelines
- Reduces manual testing by up to 90%
- Reduces test cost by up to 50%
- Accelerates delivery from weeks to minutes

Test Maturity Assessments

We create test strategies based on context-driven test maturity assessment extending TMMi and assessing testing approaches, processes, procedures, pipelines, people, and test effectiveness. These assessment points drive the creation of a test strategy centred around the product/service that supports good testing outcomes, reporting, governance and guidance. AI-driven insights can highlight recurring failure patterns and suggest improvements, helping teams focus on areas that deliver the greatest quality gains

Benefits

- Provide a framework for delivering testing services
- Provide flexible principles for carrying out testing
- Clear context-driven test approach for product assessment
- Provides certainty about test roles and responsibilities
- Increases team delivery throughput through focused testing
- Context-driven approach increases opportunity to prevent issues
- Provide visibility of testing to key stakeholders
- Provide quality measures to key stakeholders
- Provide test tool assessment for increasing tooling ROI

What we can deliver - Continued

Managed Test Service

Our agile approach aligned to CDDO, GDS provides expert capability to act as your testing experts, providing the confidence that digital services will be delivered to the right quality for citizens and staff. Version 1 AI enhanced services cover Test Assurance, Test Management, Test Consultancy, Non-functional and functional testing.

Benefits

- Reduce risk, cost and delivery time
- Increase quality of testing services
- Flexible and scalable testing teams
- On-demand access to niche testing skills i.e. security testing

Test Transformation

Context is at the heart of our Test Transformation Service – a best practice approach does not work without taking into account your business needs and situation. Version 1 extend TMMi to understand your business drivers and required maturity, the current maturity and the roadmap of change between the two. AI-driven insights can highlight recurring failure patterns and suggest improvements, helping teams focus on areas that deliver the greatest quality gains.

Benefits

- Maturity assessment report for current state
- Roadmap of improvements, how to implement them to achieve goals
- Implementation of improvements
- Consultancy throughout to stakeholders

What we can deliver - Continued

Digital Test Assurance

Version 1 Digital QA and Test Assurance aligned to agile, CDDO, GDS provides expert capability to act as your testing experts, providing the confidence that digital services will be delivered to the right quality for citizens and staff. Our AI enhanced services cover Test Assurance, Test Management, Test Consultancy, Non-functional, functional testing.

Benefits

- Continuous improvement for third party or internal testing
- Expert management of third party deliverables
- Expert Test Strategy and shift left approach to testing
- Reduced cost through mature AI driven automation/performance frameworks
- Reduced cost through tight Quality Assurance
- Scalable service to grow as you do
- Experts across all testing fields to help advise on demand
- Flexible commercial models

Managed Test Service

Version 1's agile approach aligned to CDDO, GDS provides expert capability to act as your testing experts, providing the confidence that digital services will be delivered to the right quality for citizens and staff. Our AI enhanced services cover Test Assurance, Test Management, Test Consultancy, Non-functional and functional testing.

Benefits

- Continuous improvement for third party or internal testing
- Expert management of third-party deliverables
- Expert Test Strategy and shift left approach to testing
- Reduced cost through mature automation and performance frameworks
- Reduced cost through tight Quality Assurance
- Scalable service to grow as you do
- Experts across all testing fields to help advise on demand
- Flexible commercial models

What we can deliver - Continued

Performance Test Services

Version 1 Performance Testing service helps businesses establish meaningful non-functional requirements(NFRs), supports design and development of NFRs, helps design test environments with realistic data before providing soak, load, stress testing and live monitoring. Our approach puts users at the heart of design and reduces the cost of building performant systems

Benefits

- Realistic environments and data to test
- Reduces cost of delivery through early identification of requirements
- Reduces production issues through world class monitoring
- Provides a known performant system to your users

Accessibility Testing

Version 1's Accessibility Testing Service works with you to ensure compliance to accessibility guidelines and laws, covering Web Accessibility Content Guidelines (WCAG), Equality Act 2020, GDS, BS8878. Our experts are DAC trained, helping reduce costly rework and design later in programme by shifting the testing left

Benefits

- Enables testing to be shifted left, reducing cost and increasing delivery speed
- Puts you, our customer at the heart of your delivery
- Understand how users of assistive technologies will interact with
- your product/service to improve their experience
- Embedded continuous accessibility testing ensures consistent compliance
- Flexible commercial models

About Version 1

Version 1 at a glance

29 years of experience

13 global locations

6 strategic technology partners

13 years as a great place to work

Industry best practice

€364M+ revenue 2024

82% employee engagement score (Q2 2025)

85% customer satisfaction score (Q2 2025)

The Version 1 difference

The core values at the heart of Version 1's success.

**Honesty and
integrity**

**Personal
commitment**

No ego

Customer first

Excellence

Drive

Looking forward: Our ESG targets, goals & achievements

A-

score for Carbon Disclosure Project reflecting our sustainability practices (Industry average is a C)

680+

Volunteering hours delivered by employees globally

80%

key suppliers with sustainability targets by 2025, we are committed to reducing environmental impacts across our supply chain through responsible sourcing and partnerships

217

Version 1 Impact Investors supporting our global Community First programme which aligns to the UN Sustainability Development Goals

Bronze

Ecovadis rating reflecting our ESG maturity across our strategic focus areas

930

Women in Tech members

Our four strategic ESG pillars:

**Environment
sustainability**

**Ethical
Practices**

**Responsible
Procurement**

**Social
Impact**

As a participant of the United Nations Global Compact, Version 1 is committed to aligning strategies and operations with universal principles on human rights, labour, environment and anti-corruption

Our services portfolio

Application Modernisation and Integration

Accelerating the modernisation of applications embracing sustainable engineering and AI-assisted development.

Legacy systems modernisation

Continuous modernisation

Next Gen Apps

Integrated Apps

Portfolio modernisation

Experience Design and Development

Designing, shaping and building products and solutions that deliver fantastic people and societal experiences.

Digital strategy and innovation

Product management and roadmaps

Behavioural research, analysis and journey mapping

Creative design and UX services

Product development and AI accelerated engineering

Envisioning and innovation workshops

Enterprise Applications

Optimising the core of your business with deep functional and technical expertise in Finance, People, Customer and Enterprise Performance Management (EPM).

Reshaping finance for the future

Elevating HR and people operations

Enhancing supply chain management

Amplifying customer touchpoints

Realising value with Data insights and AI

Data x AI

Becoming an intelligent, data driven organisation needs quality data x AI to make better decisions and processes.

Data strategy and architecture

Data engineering

Data analytics and visualisation

Data modernisation

Data governance

AI co-creation services

Cloud Transformation

Adopting, optimising and leveraging Cloud to unlock new or enhanced business value and innovation.

Industry specific cloud

Readiness and enablement

Migration and transformation

Operate and optimise

Specialist services

ASPIRE Managed Services

Reduce time, cost and risk by leveraging our VLA approach to run and optimise traditional and Cloud services to improve business agility and accelerate innovation.

Cloud and infrastructure management and optimisation

Oracle SaaS management and optimisation

Data and AI managed services

EBS, Peoplesoft and JDE managed service

Application management and optimisation

Digital workplace services

Our global technology partners

- Named **AWS Collaboration Partner of the Year 2024**
- Named **Global Microsoft Modernising Applications Partner of the Year Award 2023**
- Named **Microsoft Ireland Partner of the Year 2023 Winner - Social Impact**
- Named **Innovation Partner of the Year Winner - 2023 Oracle EMEA Partner Awards**
- Named **AWS Collaboration Partner of the Year - EMEA 2023**
- Named **AWS Migration Partner of the Year - EMEA 2022**
- Named **OutSystems Partner of the Year 2021**

Microsoft Partner

Azure Expert MSP

As an Azure Expert MSP and the Global Modernising Applications Partner of the Year 2023, Version 1 boasts extensive expertise across the Microsoft stack.

Premier
Consulting
Partner

An AWS Premier Consulting Partner and EMEA Migration Partner of the Year, Version 1's unrivalled expertise boasts deep expertise with 400 certifications and accreditations.

ORACLE | Partner

With 28+ years of Oracle ecosystem expertise, we're a certified Oracle Modern OPN Partner and Cloud Solutions Provider - One of Europe's most distinguished Oracle Cloud partners.

As a Premier Red Hat partner, we are experts in hybrid-cloud models and OpenShift, recognised for driving innovative solutions using Red Hat technologies.

An OutSystems Partner for Sales, Delivery and Quality Apps Program Partner, Version 1 is committed to unlocking value for our customers through low code development.

As a Snowflake Partner Version 1 enables customers to leverage Snowflake's flexibility, performance, and ease of use to deliver more meaningful data insights.
