

Development Security and Operations (DevSecOps) Services

Augment or replace your in-house DevOps team with our DevOps experts, so you can focus on your core business.

End-to-end cloud services

For all stages of your journey

Readiness and Enablement

No matter the stage of your cloud journey, we can provide services to create your strategy, enact that strategy and optimise your adoption. From ways of working to total cost of ownership, our cloud strategy and architecture services provide the kick start for customers on their cloud journey.

Migration and Transformation

Cloud as a platform can be complex with a plethora of services and technologies available. Our migration and transformation services provide deep experience combined with a breadth of knowledge to support your migration and transformation needs – from identity to landing zones to engineering.

Operate and Optimise

Continuous improvement is at the heart of our operational and optimisation services, to ensure that your workloads are running as efficiently as possible – and that you only use what you need, when you need it. From observability to FinOps, trust us for best practice and depth of experience.

How can our DevOps as a Service can help your business?

Access to Experts

Gain access to a team of experts with deep knowledge and experience in managing complex infrastructure, deploying applications, and optimizing performance. These experts can help you design and implement best practices for your DevOps processes, and keep up with the latest trends and technologies

Improved infrastructure management

24/7 monitoring and support for your infrastructure, detecting and resolving issues before they impact your business. Automation repetitive tasks, like software deployment and testing, freeing up your time and resources for more strategic activities.

Reduced Operational Costs

Our DevOps service can save you money on salaries, benefits, training, and other overhead costs associated with hiring and maintaining an in-house team. You only pay for the services you need, and can adjust your budget and resources as your business grows and evolves.

Increased Scalability and Flexibility

Teams can scale up or down quickly to meet your changing needs and workload fluctuations. They can also provide on-demand resources and expertise for specific projects or initiatives, without requiring long-term commitments or contracts

Our DevSecOps Methodology

- The key considerations are: **Get the basics right**, security understanding, secure by design, secure development, secure testing and delivery, secure operations, incremental agile security, continuous security assessment, and DevSecOps. All these considerations must not be thought about in isolation but how they each fit with and influence each other to provide a **holistic security approach** within our SDLC.
- A strong **security culture** must be created from the outset. We do this by making security visible, part of normal team conversations, and establishing a no-blame mindset and psychologically secure place to work

Integrated Security Approach

Our Version 1 security approach is agile, iterative, and risk-based, factoring in our experience and scale from across our customer engagements.

Secure Development Principles

To maintain developer awareness with the ever-evolving security landscape we use company-wide **active and passive learning**, setting a high compliance baseline within our projects, involving everyone in our teams in security conversations, and promoting lifelong learning.

Technology Stack

Digital

Middleware / Integration

Data & AI

Devops / Cloud Infra

Platforms

Languages

Terraform Competency

-  Module Library
-  Enterprise Landing Zone
-  Multi cloud and provider expertise
-  Secure Pipelines for leading CI/CD tooling
-  Genesis

Terraform

Development Strategy

Library

- Core of development
- Many small pieces of reusable code
 - GitLab Templates
 - Terraform Modules
 - Ansible Roles

Templates

- Represent type of infrastructure
- Standardised baseline
- Align best practices
- Roll out universal updates

Consumers

- Projects consume the templates
- Genesis
- *In-house onboarding tool*
- *Keep projects updated*
- Add custom code

DevOps Maturity Assessment

Evaluate your current level of DevOps capabilities and we will work with you to prioritise and improve your processes

How can our DevOps Maturity Assessment help your business?

Faster time-to-market

- Discover your current release cadence vs your desired
- Guidance on how DevOps practices can help you close the gap

Higher quality code

- Current testing practices are reviewed and gaps and potential improvements identified to improve the quality and reliability of your code

Reduce costs

- Areas will be identified where automation can be used to reduce manual effort, resulting in cost savings for the organisation.

Improved customer satisfaction

- The assessment will identify areas where stakeholders' needs, both internal and external, are not being met and we will create an action plan for each area of improvement.

DevOps Maturity Assessment

Introductory Call

One of our Business Development team will reach out to understand why you'd like to take our DevOps Maturity Assessment and explain the steps involved in this process.

Assessment & Results

At least three of your technical and non-technical staff can take our DevOps Maturity Assessment and we will provide results in a PowerPoint format.

Workshops

Version 1 Engineers will then guide you through this PowerPoint virtually or on-site to further explain concepts and help guide you to act on the results of your assessment.

Follow Up

We will check in to see how your DevOps processes are evolving and give additional feedback for management on how to keep promoting DevOps within the organisation.

Our global technology partners

- Named **AWS Collaboration Partner of the Year 2024**
- Named **Global Microsoft Modernising Applications Partner of the Year Award 2023**
- Named **Microsoft Ireland Partner of the Year 2023 Winner - Social Impact**
- Named **Innovation Partner of the Year Winner - 2023 Oracle EMEA Partner Awards**
- Named **AWS Collaboration Partner of the Year - EMEA 2023**
- Named **AWS Migration Partner of the Year - EMEA 2022**
- Named **OutSystems Partner of the Year 2021**

Microsoft Partner

Azure Expert MSP

As an Azure Expert MSP and the Global Modernising Applications Partner of the Year 2023, Version 1 boasts extensive expertise across the Microsoft stack.

Premier
Consulting
Partner

An AWS Premier Consulting Partner and EMEA Migration Partner of the Year, Version 1's unrivalled expertise boasts deep expertise with 400 certifications and accreditations.

ORACLE | Partner

With 28+ years of Oracle ecosystem expertise, we're a certified Oracle Modern OPN Partner and Cloud Solutions Provider - One of Europe's most distinguished Oracle Cloud partners.

As a Premier Red Hat partner, we are experts in hybrid-cloud models and OpenShift, recognised for driving innovative solutions using Red Hat technologies.

An OutSystems Partner for Sales, Delivery and Quality Apps Program Partner, Version 1 is committed to unlocking value for our customers through low code development.

As a Snowflake Partner Version 1 enables customers to leverage Snowflake's flexibility, performance, and ease of use to deliver more meaningful data insights.
