

Specialist Cloud Services

Specialist Services

Proprietary and Traditional Systems

We were not born in the cloud, so we understand traditional enterprise systems, architectures and environments – and are well placed to help modernise and migrate these to cloud, to achieve efficiency whilst providing the basis for onward change.

Agreements, Licensing and Audit

Our dedicated Software Asset Management Practice provides deep expertise and experience across Microsoft, AWS, Oracle and Red Hat licensing. Successfully providing audit defence and acting as a trusted advisor to our clients.

Cloud-enabled Workplace

Our cloud enabled workplace services provide the foundations for implementing a modern workplace experience through cloud, meeting the expectations of the modern, post-pandemic workforce and future Gen-Z employees.

Oracle to Cloud

Oracle is in our DNA, and we have provided over 25 years of Oracle expertise as an Oracle partner. We offer depth of insight in the migration of Oracle to Public Cloud like no other – from licensing to database, middleware and applications.

End-to-End Cloud Services

For all stages of your journey

Readiness and Enablement

No matter the stage of your cloud journey, we can provide services to create your strategy, enact that strategy and optimise your adoption. From ways of working to total cost of ownership, our cloud strategy and architecture services provide the kick start for customers on their cloud journey.

Migration and Transformation

Cloud as a platform can be complex with a plethora of services and technologies available. Our migration and transformation services provide deep experience combined with a breadth of knowledge to support your migration and transformation needs – from identity to landing zones to engineering.

Operate and Optimise

Continuous improvement is at the heart of our operational and optimisation services, to ensure that your workloads are running as efficiently as possible – and that you only use what you need, when you need it. From observability to FinOps, trust us for best practice and depth of experience.

The technological landscape is changing.

For those organisations who have already taken the first steps on their cloud journey, attention is increasingly moving away from lift-and-shift only migrations, and more towards maximising their cloud investments. Customers are keen to explore the modernisation of stickier, harder to shift workloads alongside Data Modernisation.

Version 1, a Microsoft AMMP and AWS MAP approved partner has been working with Microsoft since 2006 and AWS since 2009 and specialises in helping customers modernise and transform a plethora of complex, non-86, proprietary and legacy technologies that are often left behind. Based on previous experience we are experts at transitioning, modernising and continually optimising these solutions on cloud. As a Managed Services Provider we can also run and optimise the resulting migrated application.

What is Application and Data Estate Modernisation

Cloud Enabled Workplace

Leverage virtual desktops, virtual applications, and modern management techniques to improve your end user experience and secure your applications and data.

Azure Virtual Desktop

Secure Connection properties

Scale on demand

Citrix Workspace

Windows Multisession Enterprise

Image Management

How can our Cloud EUC offering help your business?

Secure and Productive Remote Work

- Allows access to corporate virtual desktops and applications from any internet connected device
- Secure user data by ensuring it remains on the corporate network
- Integrate AWS Workspaces or Azure Virtual Desktop with Microsoft Azure Active Directory to ensure secure access using your existing configuration
- Seamless integration with Microsoft 365 and Teams enhancing productivity

Reduce Costs and modernise VDI

- Reduce costs by scaling on demand to handle variable workloads
- Almost all users are licensed if already leveraging a Microsoft service
- Windows 10 or 11 multisession further consolidates user density to fewer Virtual Machines
- Option to use as a Disaster Recovery and Business Continuity solution with either AWS Workspaces or Azure Virtual Desktop

Simplify deployment and management

- Deploy servers from single "gold image" and attach applications via MSI-X app attach
- Leverage Azure Monitor for Azure Virtual Desktop to optimize the user experience
- Monitor your AWS Workspaces using standard AWS monitoring tools including CloudWatch, CloudTrail and Cloudwatch Internet Monitor
- Deploy and manage using infrastructure as code
- Integrates with Azure stack technologies such as Endpoint Manager and Security Centre

Virtual Desktop Deployment Methodology

Assess

- Evaluate existing architecture and map to Azure or AWS services using the relevant Cloud Adoption Framework best practices.
- Modernise RDS, Citrix Virtual Apps and Desktops and VMWare Horizon integrating or replacing with Azure or AWS services.

Deploy

- Configuration of Azure Virtual Desktop Control Plane, Base Image creation and application virtualisation with MSI-X.
- Configuration of AWS Workspaces.
- Cost optimisation using scaling and power on connect.
- Secure the deployment with lockdown policies, antimalware and implement zero trust.

Release

- Manage deployment with detailed run books and management processes.
- Support deployment with image and application updates.
- Handover and train staff on technology.
- Disaster Recovery and Business Continuity process validation.

Case Study: AWS Workspaces for Business Continuity

Requirement:

- A public sector customer requires access to MS Office, email and Instant Messaging if there is an outage to the MS Azure technology stack

Proposal:

- AWS Workspaces configured with MS Office, Outlook and Chime.
- Powered up on demand to minimise operational costs
- Access controlled through MS Active Directory and Radius MFA

Outcome:

- Proof of Concept demonstrating that the customer can use Virtual Desktop Infrastructure to meet their requirement for Business Continuity
- Minimal running costs when environment in standby
- A secure solution ensuring only authorised users have access

Access services that match your needs and maturity

Version 1 Labs – Cloud Innovation Centre

Driving Innovation in the Cloud:

A service provided to customers to explore and rapidly validate cloud and AI-empowered applications, sustainable user cases, migration and transformation.

DevSecOps and Test Automation

Why use our Labs?

To better understand how AI-powered and Cloud technologies can impact your business

To inform business case development and investment – using concrete and first-hand evidence, knowledge and experience

How do we engage?

Proof of Concept/Context (PoC) development

Collaborative engagement model

Agile development methodology

Business-Led Cloud Transformation Specialists

Re-think how people, process, and technology can play together.

Adopt, optimise and leverage cloud to unlock new or enhanced business value and innovation.

Innovate and drive value from the cloud

Business-led cloud transformation approach

We focus on cloud as an enabler for value and innovation. We believe that all IT investments must start with a deep understanding of business, and that successful cloud transformations focus heavily on business outcomes, not just technical.

Global Cloud Transformation expertise recognised by hyperscalers

Technology partners recognise our global cloud experience and leadership in cloud strategy, services, and innovation: AWS Migration Partner of the Year 2022, AWS Collaboration Partner 2023, Oracle Innovation Partner of the Year 2023, Microsoft 2023 Modernizing Applications Award

Breadth and depth of capabilities – from strategy to ways of working

With deep skills across a broad technology stack, our expert team of cloud specialists can help you with virtually any transformation challenge you're experiencing.

Unique cloud transformation IP

We've invested significantly in building cloud transformation accelerators which enable us to transform customers' estates at pace.

Innovative at our core

We help our customers plan a cloud journey that sets their business up for the future, by embracing cutting-edge technology and leveraging disruptive technology such as Generative AI.

Rich heritage in delivering across many sectors and industries

Version 1 has a strong track record in delivering successful cloud transformation programs for customers across many industries and technology stacks.

About Version 1

Version 1 at a glance

29 years of experience
