

ECLIPSE 0-19 Service

Providing pre-natal, child development and school nursing services from 0-19 years of age

The ECLIPSE 0-19 solution provides a digital and mobile platform that supports staff providing pre-natal, child development and school nursing services from 0-19 years of age. ECLIPSE enables staff to deliver a coherent and effective experience for children and young people aged 0-19.

0-19 teams focus their efforts around important stages in a child's life to improve health outcomes.

Why choose ECLIPSE 0-19 Service?

ECLIPSE software for 0-19 services will help to deliver better patient care. As per the Government's Cloud First policy, ECLIPSE is a cloud native SAAS based solution. The software is able to work on any device and is able to be tailored to the exact requirements of any 0-19 service.

ECLIPSE mobile working ensures that the number of visits to the 0-19 service can be increased. The software offers the ability for multidisciplinary teams to work together to provide a secure system.

Use of the software will not only enhance efficiency, but also the quality and availability of information provided. The data is accurate and upto date. This is enhanced through multi-agency access, whereby all frontline services that have contact with the individual can add thoughts and observations.

Through collaboration and interoperability, you will have a complete holistic view of children and young people. Details such as the relationship with family, friends, police and school can be added to the system. This has an impact on the quality of information and reduces the possibilities of data error or duplication. All of which saves time and keeps the team upto date on each service user's circumstances.

A multi-disciplinary team each have a unique login with a personalised screen based on their tasks and workflows. Data entry is much easier, and it provides the ability to record in new ways.

The team is no longer confined to the office when updating notes or locating information. Instead, team members can work from anywhere at any time, from any place; writing notes directly into ECLIPSE while with the individual, or from the office, the car, anywhere. This added flexibility will free up staff time, allowing them to spend more time on the frontline with children and young people.

Welcome to Civica

Civica is proud to be the UK's largest software company focused on the public sector, which we have served as a trusted partner for over 30 years.

Our products and services are used by 2.5 million professionals across national, regional and local government, health and care, housing, education and democracy. They deliver improved outcomes for 90 million citizens.

Our deep sector and technology expertise helps our customers to meet unprecedented challenges as they sustain and enhance public services. Through greater digitisation and automation, a growing use of cloud solutions and smart use of data, we help address rising citizen expectations for innovative and efficient public services around the world.

We have a strong commitment to delivering social value and sustainability, which includes supporting our customers' Net Zero ambitions, creating software with sustainability built in and reducing our own impact on the planet.
