

Civica Master Data Management for Policing

Mastering data to create a complete and reliable data hub

Civica MultiVue is a cloud native master data management (MDM) solution providing a consolidated view of more reliable information, from across multiple operational systems. This data is provided as a complete, accurate and sharable source to enable both enterprise-wide business intelligence and reliable analytics as well as insight to enhance customer engagement.

Why choose Civica MDM?

The Civica MDM platform enables organisations to become data-driven businesses by creating and managing a complete view of the key entities across previously siloed and disparate data sources. Using sophisticated algorithms and configurable matching rules, duplicate customer records across multiple data sources can be merged supplying a single feed of trusted data.

The configurable and scalable solution enables you to implement across your organisation and align to your business processes and priorities, providing a fundamental building block for data governance, improved decision making and enable next-generation services, reducing costs and improving operational efficiencies.

Independence – a highly configurable platform with intuitive user interface allows you to maintain and extend the solution

Value – flexible pricing and licensing options to suit your business objectives coupled with best-in-class accuracy and stewardship support to lower the total cost of ownership of the solution

Innovation – built on the latest technology with over 20 years of investment results in a robust core and new and innovative features that extend the value of MDM.

Features

- **Visualisation and relationships** – Enables relationship information to be stored, managed and explored across data fields, entities and domains to be accessed through dashboards and visualisation tools
- **Enterprise search** – Reduce duplicates and improve data quality for more complete and accurate data from a single search, aggregating data from multiple systems is available for any role, through the UI of their primary system
- **Mastering data** – Create a unified view of POLE entities, enriched across multiple sources, with a 'firewall' to improve data quality and optimise matching accuracy and performance
- **Integration** – Repeatable deployment approach with a standard interoperable data model, supporting uniform reporting, with consistent data through sharing new information.

Benefits

- **Visualisation and relationships** – Improved accessibility to joined up data, for more proactive services, so lower operational costs while improving officer safety and reducing public risk
- **Enterprise search** – Significantly reducing research time for command and control, front line officers, analysts and investigations with data that is more trusted, so all roles are better informed for better officer and public outcomes
- **Mastering data** – Creating a complete and accurate view of POLE, supporting multiple initiatives (use cases) to increase automation and the level of trusted insights to reduce operational costs, improve officer and public safety
- **Integration** – Reduce the manual effort to deploy and integrate a solution that supports POLE, increasing self-sufficiency so reducing initial and ongoing costs.

Welcome to Civica

Civica is proud to be the UK's largest software company focused on the public sector, which we have served as a trusted partner for over 30 years.

Our products and services are used by 2.5 million professionals across national, regional and local government, health and care, housing, education and democracy. They deliver improved outcomes for 90 million citizens.

Our deep sector and technology expertise helps our customers to meet unprecedented challenges as they sustain and enhance public services. Through greater digitisation and automation, a growing use of cloud solutions and smart use of data, we help address rising citizen expectations for innovative and efficient public services around the world.

We have a strong commitment to delivering social value and sustainability, which includes supporting our customers' Net Zero ambitions, creating software with sustainability built in and reducing our own impact on the planet.
