

Civica Declare

Capture declarations of interest seamlessly on any device, systematically publish and deliver greater transparency

Civica Declare is the leading solution for managing NHS conflicts of interest declarations.

Our fully integrated governance software helps NHS organisations to manage employee conflicts of interest and adhere to consistent principles to meet NHS England mandatory requirements. It's a 3-way system for the public to inspect and interrogate declarations, for staff to register their declarations and for the Corporate Secretariat teams to manage the process.

Declare enables your staff to make their declarations online simply, quickly and easily on PC, tablet or mobile. Real-time public reporting and web integration helps increase public confidence by providing a transparent view of how decisions are made and taxpayers' money spent.

Why choose Civica Declare?

As the UK's leading provider of engagement and governance tools for the health sector, our solutions are used extensively across the NHS.

Designed and developed in partnership with a leading NHS Trust and in response to NHS England's guidance 'Managing conflicts of interest in the NHS', Declare continues to evolve in collaboration with our vibrant customer user community who inform and advise on new features and tools.

- Future proof your organisation – continual development informed by user community. All clients have a say in future feature development
- Capture and publish with confidence.

Welcome to Civica

Civica is proud to be the UK's largest software company focused on the public sector, which we have served as a trusted partner for over 30 years.

Our products and services are used by 2.5 million professionals across national, regional and local government, health and care, housing, education and democracy. They deliver improved outcomes for 90 million citizens.

Our deep sector and technology expertise helps our customers to meet unprecedented challenges as they sustain and enhance public services. Through greater digitisation and automation, a growing use of cloud solutions and smart use of data, we help address rising citizen expectations for innovative and efficient public services around the world.

We have a strong commitment to delivering social value and sustainability, which includes supporting our customers' Net Zero ambitions, creating software with sustainability built in and reducing our own impact on the planet.
