

Civica Involve

Drive community and stakeholder engagement

Civica Involve includes powerful engagement, feedback and analytics tools – making it easy for you to reach your community, staff and stakeholders and make better informed decisions.

Involve enables the creation of striking community and stakeholder engagement websites. Choose from a wide range of widgets to drive engagement, via emails, SMS, and QR codes. Using multiple channels means you can reach everyone in your community. To maintain the momentum, your website users can sign up to receive email updates or push notifications, leave comments and submit their ideas.

As well as informing your audience with timelines, documents, and maps, you can encourage participation with surveys and polls. You can even establish a community research panel for continuous feedback. The system will automatically notify your participants when new surveys are released.

When it comes to using your data, you'll have a wide choice of analysis tools and real-time interactive dashboards. Convert complex data into word clouds, location heatmaps or bar charts – or create pivot tables for deeper analysis. Filter responses and export to a variety of other formats.

Why choose Civica Involve?

Involve puts over 40 tools at your disposal, so you can reach your audience, get them involved in your community and learn more about their views.

As the UK's leading provider of engagement and governance tools for the health sector, our solutions are used extensively across the NHS.

Welcome to Civica

Civica is proud to be the UK's largest software company focused on the public sector, which we have served as a trusted partner for over 30 years.

Our products and services are used by 2.5 million professionals across national, regional and local government, health and care, housing, education and democracy. They deliver improved outcomes for 90 million citizens.

Our deep sector and technology expertise helps our customers to meet unprecedented challenges as they sustain and enhance public services. Through greater digitisation and automation, a growing use of cloud solutions and smart use of data, we help address rising citizen expectations for innovative and efficient public services around the world.

We have a strong commitment to delivering social value and sustainability, which includes supporting our customers' Net Zero ambitions, creating software with sustainability built in and reducing our own impact on the planet.
