

ECLIPSE Special Educational Needs & Disabilities (SEND)

Our solutions provide management oversight of the whole process to ensure your teams are meeting the statutory timescales and reporting

ECLIPSE SEND (Special Education Needs and Disability) provides a Code of Practice compliant solution to managing the referral, processing and management of EHCPs for Local Authorities. Tracking progress against key milestones in the process as well as producing the SEN2 return.

Service Description

ECLIPSE SEND ensures that Local Authorities have an effective case management solution that allows multiple agencies, including the family, to be involved all the way through the process. Our solutions provide management oversight of the whole process to ensure your teams are meeting the statutory timescales and reporting, whilst also giving your teams and easy to use, intuitive tool to support their day-to-day work.

Saving Money, Creating Efficiency

Working in conjunction with Local Authorities, we have developed a solution which automates administration tasks, therefore reducing the burden on your teams to focus on the things that really matter to your clients.

ECLIPSE ensures practitioners can access information anywhere, anytime regardless of their role in the process, to provide an efficient way of information gathering, assessment and co-production of EHCPs.

Informing your Citizens

ECLIPSE is able to be delivered with a citizen front end. Citizens can access all information about their EHCP and care record as well as the Local Offer.

This enables citizens and/ or their carers to go online and make informed choices about the services provided in their area.

Welcome to Civica

Civica is proud to be the UK's largest software company focused on the public sector, which we have served as a trusted partner for over 30 years.

Our products and services are used by 2.5 million professionals across national, regional and local government, health and care, housing, education and democracy. They deliver improved outcomes for 90 million citizens.

Our deep sector and technology expertise helps our customers to meet unprecedented challenges as they sustain and enhance public services. Through greater digitisation and automation, a growing use of cloud solutions and smart use of data, we help address rising citizen expectations for innovative and efficient public services around the world.

We have a strong commitment to delivering social value and sustainability, which includes supporting our customers' Net Zero ambitions, creating software with sustainability built in and reducing our own impact on the planet.
