

Civica MDM Proof of Value

Rapidly identify the business value from managing your data

Civica MDM is a cloud native master data management (MDM) solution that enables organisations to become a data-driven business. It creates a complete and accurate view of your customer, citizen, tenant or person(s) of interest across previously siloed and disparate data sources.

Why choose Civica MDM Proof of Value service?

The service provides organisations with a discrete platform that quantifies the value and benefits that can be directly derived from implementing an MDM platform, in addition to identifying duplicates and critical data quality issues.

Deployed for use as a service, the powerful capabilities of the Civica MDM platform enable organisations to rapidly process large batches of data, apply standardised data deduplication and data cleansing procedures, to identify the value that can be realised by implementing an MDM solution with minimal investment.

The service is a light-weight and rapid implementation of key MDM processes to your data providing the end-to-end cleansing, matching and merging of datasets to deliver one-trusted result set. Resulting in accelerated data processing times, avoidance of project delays, reduced costs and improved operational efficiencies.

Features

- Fully hosted solution with no installation required and minimal customer resources
- Secure processes and environment to minimise risk.
- Proven predefined matching and data quality rules
- Automated data processing
- No requirement for Data Stewardship
- Rapidly achieve accurate matching results
- Preconfigured comprehensive data model
- Enhance data quality.

Benefits

- Quickly establish an objective view of your organisational data quality
- Identify the value and potential benefits from deploying Master Data Management in your organisation
- Provide re-usable configurations and knowledge that will reduce the full implementation timescales
- Demonstrate the automation possible for the end-to-end process of cleansing, matching and merging data
- Create a complete and accurate person/property view across all sources (other domains also)
- Eliminate duplicate records
- Identify records that span multiple sources
- Support data migration and data quality projects.

Welcome to Civica

Civica is proud to be the UK's largest software company focused on the public sector, which we have served as a trusted partner for over 30 years.

Our products and services are used by 2.5 million professionals across national, regional and local government, health and care, housing, education and democracy. They deliver improved outcomes for 90 million citizens.

Our deep sector and technology expertise helps our customers to meet unprecedented challenges as they sustain and enhance public services. Through greater digitisation and automation, a growing use of cloud solutions and smart use of data, we help address rising citizen expectations for innovative and efficient public services around the world.

We have a strong commitment to delivering social value and sustainability, which includes supporting our customers' Net Zero ambitions, creating software with sustainability built in and reducing our own impact on the planet.
