

RiskTree® Risk Management consultancy and SaaS: Pricing

In order to use the RiskTree process, clients will need a subscription to the software as well as training in the process, provided by our team.

Key information

Pricing for a RiskTree subscription starts at £20,000 per year, per organisation. This cost includes:

- Two user licences;
- Five days of training time (one trainer for five days, or two trainers for 2.5 days)
- Two call-off days.

The training days will be run as hands-on RiskTree workshops, facilitated by our trainer(s), helping the designated staff understand both the process and the use of the software.

Packages with more users, more training, and more call-off days can be quickly arranged.

We offer enterprise licences for organizations requiring a larger number of users and unlimited assessments.

The consultancy service is resource-based; please see our SFIA rate card for details of current consultancy rates. Arrangements for other expenses will be agreed in writing with the client at the start of the engagement.

We strongly encourage clients to take out a call-off contract for any additional assistance that might be required. For example, we can use this to provide facilitation for RiskTree workshops where an independent facilitator is preferred, or for workshops considering particularly large or complex systems. The call-off can also be used for any client-specific system customizations that might be requested.

Rates and expenses are exclusive of VAT.
