Epiq Discover™ Fee Schedule

Epiq Discover™ Per Matter Pricing

SAP Code	Description	Capacity (GBs)	Data Hub Storage Included (GBs)	Unit of Measure	United Kingdom (GBP)
EQD102	Epiq Discover™ – Per Matter per Month	50GBs	50GBs	Per Month	£270.00

Hosting Size for invoicing is the peak of the summed size of all native files/imaging files, database and text index hosted in the platform across different stages of discovery workflow (collection, processing, review) within a given month range. Data hosted in excess of the included capacity is charged the Document Hosting rate listed below for SAP code HST757. The Per Matter Fee includes use of the Epiq Discover™ technology. All professional services provided at hourly rates.

The types of hosting and storage available in the Epiq Discover™ platform are as follows:

- **Data Hub Storage** - Data Hub storage serves as a platform for uploading and downloading documents, similar to an FTP site. Data can be uploaded for collection, processing, and loading into Epiq Discover™. Additionally, users have the option to configure document exports/productions to be automatically downloaded to the data hub storage, facilitating easier access and download. Per Matter pricing includes the specified amount of data hub storage noted above at no charge. Additional data hub storage used in a given month is charged at the rate listed below for SAP Code EQD758.
- **Early Data Assessment** – Early data assessment is used for culling documents prior to review. Users will have access to native files metadata and text, with limited ability to tag documents. Users can leverage Epiq's proprietary Data Assessment Dashboard to filter out documents ahead of review. Data stored in the Early Data Assessment module is counted against the Per Matter capacity.
- **Review Hosting** - Review Hosting is where full document review and associated functionality can be utilised including things like review coding, redaction, translation, transcription, production, etc.) Data stored in the Review module is counted against the Per Matter capacity.
- **Dormant Hosting** - Projects can be placed into dormant status which is a nearline hosting option. The project will remain online, but no user access is permitted. Dormant projects are charged at the hosting rate listed below and in place of the Per Matter monthly fee.

The Epiq Discover™ per matter fee includes the following application functionality.

- Remote/Self-collection
- Ingestion & Filtering including early data assessment features
- Process & Promote to Review Database
- Hosting/Storage
- Imaging/OCR
- Third Party Data Loading
- Productions
- Automated Redactions
- Data Transfer

The Epiq Discover™ per matter pricing also Includes the following support related items:

- Help Desk Support
- Client onboarding program includes a one-time total of two (2) PM hours (PRO310) for initial setup & training, billed hourly thereafter
- User Documentation
- Access to additional Epiq services and experts under preferred partnership rates

By utilising the services, you acknowledge and agree to the following terms and conditions: Any use of features that involve Graph API's, including but not limited to data retrieval, analysis, or visualisation, may be subject to additional costs imposed by the API manufacturer. These costs are separate from the charges associated with the services provided by Epiq. You are solely responsible for understanding and

complying with the pricing, billing, and terms of use established by the relevant API manufacturer. Epiq is not responsible for any charges incurred as a result of your use of Graph API's.
