01 Pricing

This document is a Pricing Document for the PointX (Points of Interest) as a Service offered by Landmark Information Group (Landmark) as Lot 2b, Cloud Software as a Service (SaaS), through the G-Cloud framework.

Landmark's service delivers reliable, always-on access to authoritative points of interest datasets branded, configured and delivered in the format required by each organisation. The service provides flexible, scalable data services that reduce lead times and cost, provide consistent updates and allows teams to benefit from the latest technology without the burden of internal data management. Supported by a dedicated helpdesk, high levels of usability and a trusted single-source provider, Landmark's service ensures uninterrupted access to high-quality geospatial intelligence, responsive, adaptable and built to meet operational, analytical and decision-making needs.

The Annual Fee is available across Great Britain or National Geographies and represents the fixed yearly subscription cost for accessing all Points of Interest included in the Service. This charge covers full use of the managed SaaS platform for a 12-month period and is invoiced upfront under the managed service subscription model.

Description	Number of Points (December 2025 release)	Price
Great Britain*	Over 3,600,000	£198,000
England	Over 2,992,000	£165,000
Scotland	Over 460,000	£46,500
Wales	Over 230,000	£35,000

Table 1: Annual fees for a 12-month subscription providing PointX data access via a secure unified API, with quarterly refreshes, credential provisioning, standard UK business-hours support, ≥99.9% SLA-aligned availability and end-of-contract access removal. VAT, consultancy, training, support upgrades and expenses are excluded.

* Northern Ireland and United Kingdom data can be provided on request, due to Supplier licensing arrangements.

In addition to these standard geographic packages, we can also provide on request:

- Other bespoke geographies, such as regions, local authority areas, or custom boundaries.
- Selective category packages, allowing you to licence only the POI themes or feature types relevant to a specific use case.

What the Annual Fee Includes

- **12-month Subscription:** Includes full access to datasets detailed in the description in Table 1.
- **Access to the unified API:** Includes application metadata, georeferenced data and integrated documentation retrieval.
- **Data Refresh and Ongoing Data Enrichment:** Ensures all data is current throughout the subscription term.
- **Secure Authentication Provisioning:** Includes API key issuance and user credentials for token generation.
- **Standard Service Desk Support:** 09:00–17:00 UK business days and ITIL-aligned incident/change management processes.

- **Service Availability Aligned to the SLA:** With $\geq 99.9\%$ monthly uptime for managed service tooling and monitoring.
- **Offboarding and Deactivation Management:** Includes safe removal of access at contract end.

What the Annual Fee Excludes

- **VAT:** All prices are exclusive of VAT. (G-Cloud pricing conventions require ex-VAT pricing; VAT is applied at invoicing.)
- **Expenses:** Any travel or additional consultancy expenses are not included unless separately agreed.
- **Optional Managed Support Tiers:** Such as extended hours support (e.g. 24x7 cover), technical account management or proactive monitoring bundles beyond the standard service.
- **Training Packages:** Packages are available but not included in the base subscription (training/support is “available if required” rather than bundled).
- **Integration or Technical Consultancy:** Unless purchased as an additional service (e.g. API integration support, GIS platform integration).
