Offensive Security Services

AmberWolf

AmberWolf – Service Definition: Offensive Security Services

Service Description

AmberWolf's advanced offensive security services combine threat-led assessment, real-world attack simulation, and applied research to help organisations validate security controls and strengthen resilience.

Services include (but are not limited to):

- Red and Purple Teaming
- Regulatory Threat-Led Penetration Testing/TLPT
- Attack Path Mapping
- Security Research
- Product Efficacy Testing and RFP Bake-Offs
- Gold and Black Team Reviews.

AmberWolf

AmberWolf – Service Definition: Offensive Security Services

Features	Benefits
▪ Red Teaming simulates real-world attacks to uncover exploitable weaknesses. ▪ Purple Teaming combines offensive security to improve detection response. ▪ Gold Team reviews provide strategic oversight aligned to business risk. ▪ Black Team reviews test physical security/insider threat exposure. ▪ Threat-led penetration testing for controls, monitoring, response (CBEST, GBEST, TBEST). ▪ Attack Path Mapping exposes weaknesses enabling movement across environments. ▪ Foundational logging ensures security data is captured across systems. ▪ Log efficiency optimises security logging, monitoring performance, operational costs. ▪ Product Efficacy Tests/Bake-Offs compare tools to validate real-world protection. ▪ Research explores emerging threats, attack techniques, and new technologies.	▪ End-to-end engagement support to deliver realistic real-world attack simulations. ▪ CREST CCRTS/CCRTM accredited consultants with red/purple team expertise. ▪ Advanced to Nation State attacker capability/techniques. ▪ Collaborative purple team engagements improving detection capability/security skills. ▪ Enhanced understanding of control performance across critical security operations. ▪ Security reporting translating attacker behaviour into business risk insight. ▪ Identifying attack paths impacting detection, response and cyber resilience. ▪ Faster threat detection/response supported by advanced monitoring systems. ▪ Enhanced real-world attack readiness against sophisticated targeted cyber threats. ▪ Alignment with the MITRE ATT&CK framework, ensuring adversary emulation.

Service Scope

- Client System Availability: Certain services and tests require systems to be available for assessment, with access to the environments and associated accounts and credentials.
- Client Authorisation: We require a signed authorisation form in line with computer misuse act.
- Remote Consultants: All staff operate and provide support remotely.

User Support

Email/Online Ticketing Support

- Monday to Friday 9am to 5pm: Responses within one working day
- Out-of-hours: Responses the next working day
- Alternative response times to be discussed during mobilisation.

Phone Support

- Monday to Friday 9am to 5pm

Support Levels

Support enquiries are handled by our dedicated consulting team, ensuring each request receives the right level of expertise. We will assess the complexity/requirements of your request and escalate to an appropriately experienced member of staff (In escalating order: Consultant, Team Leader, Director) to ensure your issue can be resolved quickly/effectively. This gives you direct access to experienced cybersecurity professionals, minimising risks and maintaining operational continuity. Planning, pre-requisites, prep calls, initiation, updates, comms during project, post project read out and wash-up/clean-up is part of standard service and does not incur additional costs. Remediation and continued advisory post project will cost additional.

Staff Security

Staff screening performed which conforms to BS7858:2019

Government security clearance

Up to Developed Vetting (DV)

We do not provide discounts for educational organisations.
