

Stop Ransomware in Its Tracks: Prevention, not just detection

A successful ransomware attack can devastate your organisation—causing financial loss, operational disruption, and reputational damage. Traditional endpoint security solutions often fail to detect or prevent sophisticated ransomware, leaving critical data and systems vulnerable. The need for rapid detection, prevention, and recovery from ransomware-specific threats has never been greater.

The answer: a proactive, intelligent ransomware defence.

How Sapphire Can Help You

Sapphire's Ransomware Prevention Service provides a comprehensive, layered defence, powered by an industry-leading Anti-Ransomware Platform. Designed to complement your existing security investments, and with a very specific focus on ransomware, it delivers unique capabilities that close the gaps left by conventional solutions.

Key Features:

- **Prevention & Detection:** Blocks ransomware-related files and processes from executing; detects and stops ransomware behaviours in real time—even zero-day and novel variants.
- **Rapid Recovery:** Intercepts encryption keys for swift decryption—no ransom payment required; minimises downtime.
- **Comprehensive Support:** 24x7x365 monitoring by the Ransomware Detection and Recovery (RDR) Team; seamless integration with your SIEM, XDR, and SOAR platforms; expert support from Sapphire's Security Operations Centre (SOC).
- **Data Protection:** Prevents mass data exfiltration across your organisation.

The Benefits:

By partnering with Sapphire, you gain resilience, rapid recovery, and peace of mind. You will benefit from:

- Comprehensive and proactive ransomware protection
- Reduces mean time to recovery (MTTR) by up to 90% reduction
- Removes the need to pay ransom demands

Key Benefits

- ✓ Provides comprehensive ransomware protection
- ✓ Delivers proactive threat detection and response
- ✓ Minimises operational disruption
- ✓ Enables rapid recovery, reducing costs
- ✓ Integrates with existing security solutions

Take Action: Protect Your Business Today.

www.sapphire.net / 0845 5827001

- Enhances security posture and compliance
- Provides expert support and incident response, 24/7
- Minimises operational disruption in the event of an attack
- Enables rapid recovery and cost reduction
- Integrates seamlessly with existing security solutions

The Outcome: Confident, Ransomware-Resilient, and Future-Ready

With Sapphire's Ransomware Prevention Service, your organisation will confidently withstand and recover from ransomware attacks. Your security team can focus on strategic priorities, knowing ransomware threats are proactively managed. Business continuity is assured, and your reputation remains protected—even as cyber threats evolve.

Don't wait for ransomware to strike. Contact Sapphire today and discover how our Ransomware Prevention Service can safeguard your organisation's future.
