

Make sense of the vast amounts of data collected by Government Departments to identify fraudulent activity efficiently and easily with SAS In-memory solution for G-Cloud.

SAS® Fraud Insights on G-Cloud

SAS Fraud Insights for Government on G-Cloud helps make sense of the vast amounts of data collected by government departments to identify fraudulent and audit activities by combining data from different lines of business or departments and include external data, where available, to spot trends from a richer view of individual and social network activity. It allows teams to analyse gigabytes of data at the speed of thought, providing analysts with the necessary insight to act upon early indicators of fraud. SAS Fraud Insights is built on a foundation of SAS Visual Analytics in a hosted secure environment built on Microsoft Azure. Users can create charts, maps, flow diagrams, automated models, and apply filters and selections to further refine their analysis towards detecting fraudulent and audit activities and gain a consolidated view of fraud risk.

Indicative Pricing

Solution Fee by Offering	Small	Medium	Large
Data Storage Allowance	1TB	1TB	15TB
Report Viewers	25	250	5000
Safety Analysts/Data Scientists	5	46	126
User Concurrency (Viewers and Analysts)	7	61	1262
One-time Start-up	£23,284	£26,704	£29,241
SAS Cloud Hosted Total Fee per Annum (Hosting, Software and Offering Services)	£174,791	£587,162	£5,100,851
Year 2 (option)	£177,153	£605,516	£5,298,828
Year 3 (option)	£179,610	£624,604	£5,494,323

SAS Fraud Insights is priced on a user basis and as an annual hosted license fee payable in advance. Fees include a one-time implementation and onboarding charge. Each environment includes 4TB-8TB of cloud storage (based on environment sizing). The pricing in the table above is for representational purposes and is based on users that comprise Analytics Viewers (for example, report consumers) and Analytics Developers. The Cloud infrastructure is sized based on the volume of data loaded into the system, the number of concurrent users accessing the system and the type of analytical workload that is running. During initial discussion, SAS system sizings will be made available for review and validation against requirements. Should requirements sit outside of these parameters, SAS and the customer will participate in a discovery exercise to identify and undertake the appropriate activity to re-size and recalculate costs based on the output of the exercise.

Our teams know how to get the most from the SAS Platform. With experience acquired across public, financial, health care and commercial sectors, they are familiar with common regulatory compliance requirements.

Similarly, each of our Public Sector customers is different, and will have differing requirements for analysis and reporting. Analysis and reporting capabilities are not provided out of the box and require customisation.

This can be done by the customer themselves based upon training by SAS. Alternatively, SAS offers tiered customisation service bundles to build capabilities into your delivery based on your requirements. A blend of SAS and internal customisation can also be supported.

These Service bundles are tiered by complexity and requirement – our engagement manager will work with you to work through your requirements and arrive at the correct service bundle to meet your requirements – the tiering and pricing for the bundles is contained within the following table:

	Tier	Cost
PoC/Micro/Small Deployment	1	£13,500
	2	£40,500
	3	£67,500
PoV/Pilot/Large Deployment	4	£99,999
	5	£149,999
	6	£199,999
Small Defined Project	7	£249,999
	8	£374,999
	9	£499,999
	10	£599,999
Medium Defined Project	11	£749,999
	12	£899,999
	13	£999,999
Large Defined Project	14	£1,299,999
	15	£1,399,999
	16	£1,599,999
X Large Defined Project	17	£1,899,999
	18	£2,249,999
	19	£2,499,999
XX Large Defined Project	20	£2,999,999
	21	£3,999,999
	22	£4,999,999

If customer capability, capacity and customisation requirements cannot be met via one of our pre-defined commercial bundles, SAS can price accordingly for any bespoke service required, using the same overall pricing methodology.

Additional analytics service such as model development, analysis, data engineering or reporting services are available via the SAS Cloud Support Service which is also available on G Cloud.

Fees exclude V.A.T.

- Each service offering includes SAS Cloud Infrastructure with software, hardware, hosting services and technical support, and implementation on-boarding services
- The Fees do not include development and testing environments
- The one-time implementation and on-boarding fees must be paid in advance
- SAS/ACCESS engines are included
- Fees based on UK usage only
- Cloud managed service pricing does not include audit and user log streaming capability which will be priced separately subject to data volumes and number of users.

Services Assumptions

- Single Sign On using System for Cross-Domain Identity Management (SCIM)
- Installation, setup, and configuration of the SAS Platform
- Excludes Log Streaming
- 99.5% Uptime guarantee across the platform
- 30 min response time for blocker issues
- Continuous monitoring and support of the platform 24x7
- SAS Administration (initial and on-going for contracted term)
- Hotfixes and Maintenance Updates
- SAS Project Manager (single point of contact during implementation phase)
- SAS Technical Account Manager (TAM – post implementation phase)
- Fully Managed IT Infrastructure Support
- Online Documentation and Communication Tools (Issue tracking system and collaboration tools)
- On call Application and Technical Support Teams (24/7 support)
- Secure Private Cloud hosted with Azure
- Consultant's Working Day – 7.5 hours exclusive of travel and lunch
- Working Week – Monday to Friday excluding national holidays
- Travel, mileage Subsistence – Included in day rate within M25. Payable at department's standard T&S rates outside M25
- Professional Indemnity Insurance – included in day rate
- Fees represent SAS Public Sector Pricing only
