

Education Restore Bundle

One Bundle. Complete Flexibility. Total Compliance.

Modern cyberattacks and admin errors put schools at risk of data loss and identity compromise. Native tools often fall short, leaving gaps in protection and slowing recovery.

Every school's IT environment is different. Some rely on Microsoft 365, others on Google Workspace, and many have a mix of cloud and on-prem systems. Managing separate backup tools for each platform creates complexity, cost, and compliance risk.

The Education Restore Bundle, powered by CyberSentry, gives you one affordable solution that covers all major platforms—so you can protect what matters most to your school, without paying for tools you don't need.

Why It Works for Every School

- » Flexible Coverage: Use the components that fit your infrastructure—Microsoft 365, Entra ID, endpoints, Azure VMs, Google Workspace.
- » Comprehensive Protection: Everything is included, so you can expand coverage anytime without extra cost.
- » DfE & RPA Compliance: Meets backup standards and RPA conditions for cyber risk protection.
- » Predictable cost: Annual upfront contract with no overage charges

Unified Management: One platform, one price—no tool sprawl, no gaps.

Microsoft 365 Backup

Immutable, off-site backups for Exchange, OneDrive, SharePoint, Teams, and OneNote with unlimited retention.

Entra ID Backup

Protection for users, groups, roles, and policies, ensuring resilience against identity compromise, misconfigurations, and accidental deletions.

Machines Backup

Secure, automated backups for physical and virtual endpoints with rapid, reliable recovery.

Azure VM Backup

Direct Azure integration for full-VM or file-level restores, delivering scalable cloud-native disaster recovery.

Google Workspace Backup

Protection for Gmail, Google Drive, Classroom, Contacts, and Calendar with granular restore options.
