

STAY AHEAD OF CYBER THREATS WITH REGULAR VULNERABILITY ASSESSMENTS

What is a vulnerability assessment?

A vulnerability assessment is a complete evaluation of your network and systems to uncover security weaknesses before they are exploited by attackers.

Vulnerability Assessment identifies potential weaknesses in a system, providing a detailed map of vulnerabilities and their severity.

Penetration Testing, on the other hand, goes further by actively attempting to exploit these vulnerabilities to assess real-world impact. It's crucial to do both: assessments help you understand risks, while penetration tests validate your defences and ensure robust security.

WHY PERFORM REGULAR ASSESSMENTS?

- New vulnerabilities are discovered continuously.
- Your systems and network change frequently.
- Attackers are constantly looking for new targets.
- Assessments identify vulnerabilities that emerge over time.
- It provides an updated view of your security posture.

WHAT ARE THE KEY BENEFITS OF VULNERABILITY ASSESSMENTS?

- Identify unknown weaknesses and vulnerabilities.
- Quantify and prioritise risks to your business.
- Uncover vulnerabilities before they can be exploited.
- Demonstrate security due diligence to customers and partners.
- Raise awareness of cyber risks across the organisation.
- Keep IT security knowledge and skills up-to-date.

WHY DOES IT MATTER?

- **Proactive Defence:** Vulnerability assessments help organisations identify security gaps before attackers exploit them. It's a checkup that uncovers hidden risks.
- **Risk Mitigation:** By discovering vulnerabilities through assessments, you can remediate issues before they lead to exploits, data breaches or downtime.
- **Compliance:** Many regulations and standards require periodic vulnerability assessments to ensure systems are free from security holes and compliant with infosec best practices.

WHY STONE?

When it comes to vulnerability assessments for your organisation, it pays to work with qualified professionals.

- **Compliance Matters:** Trust our CREST and Cyber Scheme certified assessors.
- **Qualified Professionals:** For assessments, choose experts. NCSC recommends CHECK scheme certified assessors for government entities and CREST/Cyber Scheme certified assessors for non-governmental organisations.
- **Peace of Mind:** Our team complies with industry standards, ensuring legal, ethical, and high-quality vulnerability assessments..

Contact us today to discuss vulnerability assessment services for your organisation.

Our experts can help you stay a step ahead of hackers trying to infiltrate your network.

We offer flexible payment plans, including bespoke subscription models to suit your budgetary needs and one-off payments for cybersecurity services.

Contact our experts today to get started!
