DIGITAL MARKETPLACE G-CLOUD 15 – CLOUD SOFTWARE-PRICING FOR PUBLIC SECTOR ENTITIES ONLY

D&B SHIPPING DATA & SUPPLY CHAIN MAPPING PRICING OVERVIEW

D&B Data Cloud houses the Dun & Bradstreet global commercial database with more than 620 million companies worldwide, across 220 markets with 30,000 global data sources updated 5 million times per day, including: 3,000,000 corporate family trees, over 1B trade experiences, banking data, firmographics, social signals, business registrations, credit scores and ratings. The Shipping Insights file includes data across over 310k active shippers. Summary statistics are shown below in Diagram 1.

Diagram 1.

The D&B Data Cloud provides a global commercial database, supporting the increasing demand for supply chains to be mapped. The D&B Shipping insights support supply chain mapping, then the full suite of risk scores and ratings can be utilised across the wider supply chain to manage risk and find alternative suppliers.

The shipping data helps in identifying the key players and pinpointing areas where concerns may arise, and with the use of Harmonised Shipping Codes, the goods in the container can be exposed, including ports on route to final destinations.

- **Pricing for the shipping data is via API or batch.**
- **Pricing for supply chain mapping is based upon a project basis**

PRICING

Please see below for the volumes of input data, this is based upon matching the shipping file attributes to a customer's own supplier records or other customer input record.

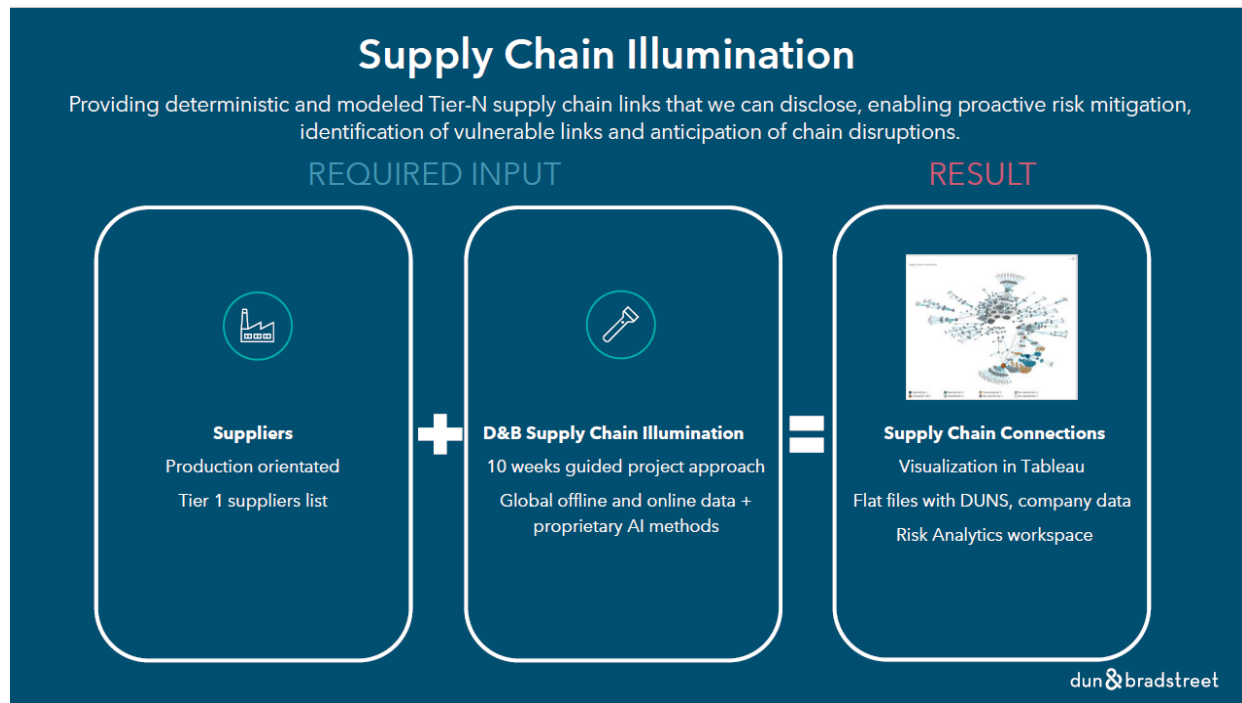

The data delivery can be via API or Batch delivery.

All prices quoted are exclusive of VAT, which will be charged at the standard rate.

Product	Data	UK / Europe		Global	UK / Europe		Global	UK / Europe		Global
		Scenario 1			Scenario 2			Scenario 3		
		Region 1	Region 2		Region 1	Region 2		Region 1	Region 2

SUPPLY CHAIN MAPPING PRICING

The process for a supply chain project is as below. This can be tailored to a customer's requirement as need be.

For pricing purposes please see details below.

Up to 500 Tier 1 suppliers provided by the customers.

To achieve a holistic view on N-Tier supply chain risk by identifying N-tier network, where D&B data is available.

Review on Tier 1 Supply Chain with focus on Tier2 and Tier3 (e.g., Tier1-Tier2->Tier3)
Identifying interconnected suppliers (e.g., Tier 1A is interconnected to Tier 1B through same Tier 2 supplier).

Multi-role Tier (e.g., Tier 1A is at same time Tier1, and Tier2)

N-Tier family members (suppliers sharing same parent)

High risk identification

Focus on disclosable part of the Network across the globe.

PROJECT DELIVERY

- One off delivery in flat file (Xlsx, Txt or CSV)
- List of Tier1 suppliers and their connection to Tier2/Tier3 disclosable suppliers
