DIGITAL MARKETPLACE G-CLOUD 15 – CLOUD SOFTWARE-PRICING FOR PUBLIC SECTOR ENTITIES ONLY

D&B DATA CLOUD PRODUCT AND PRICING OVERVIEW

For supply chain and compliance requirements there is a demand for data about suppliers, including global family trees or hierarchies, contact details and compliance checks to keep pace with the regulatory landscape and for example the new procurement act Economic and Financial Standing checks.

The modern data demands are essential for ensuring efficient, transparent, and compliant workflow within supply chain operations. They also support efforts to enhance sustainability, mitigate risks, and improve overall performance.

At Dun & Bradstreet we continuously monitor our vast number of sources for changes that impact information in the Dun & Bradstreet Data Cloud, including dynamic changes to business relationships. Changes are verified, and updates made to the Data Cloud as relevant. Our Data Blocks Monitoring capability advises of such changes.

DATA BLOCKS FOR SUPPLY AND COMPLIANCE NEEDS

The pricing of attributes varies depending upon the data blocks chosen as per the image below and detail to follow:

D&B DATA BLOCKS

 Company Entity Resolution	 Hierarchies & Connections	 Company Information	 Company Financials	 Third-Party Risk Insights
 Derived Trade Insights	 Diversity Insights	 ESG	 Filings & Events	 Ownership Insights
 External Disruption Insights	 Shipping Insights	 Global Financials	 Financial Strength Insights	 Payment Insights

The Blocks of attributes, can be accessed via AI Ready Data, Agents, API, or via a batch method, or using one of the data sharing platforms such as Google Cloud, Snowflake or Databricks. Customer data can be provided to D&B in bulk for matching and assigning the DUNS number, to allow for further enrichment for the many uses as above.

The data blocks available are defined in the service definition.

Product pricing is based upon:

The number of base records to match and update

The levels of data blocks, which provides access to different data attributes.

The region the data entity is in.

The use case or 'Domain'

For example the block required for any business entity is Company Information this comes in 4 levels

Company Information

(companyinfo_*_v1)

Required access to the data per use case. E.G., If you are using the data for just Compliance use case but then wish to add on for a Supply Chain use case the costs will not be double as the additional use case requirement is discounted as below:

DOMAINS AS BELOW -

PRICING DISCOUNT ON OVERALL COSTS > 1 DOMAIN

- a. Compliance
- b. Supply Chain
- c. Finance
- d. Sales & Marketing
- e. Master Data

Can take any domains together		# of Domains	Domain Discounts
	Supply	2	13%
	Finance	3	17%
	S&MS	4	19%
	MDM	5	21%

Therefore, these prices discount the data blocks and levels you choose. The pricing table with the blocks overleaf shows a supply chain scenario.

		Supply Use Case	
		Scenario 1	Scenario 2
Region 1		1000	1000
Region2		500	500
Total		1500	1500
Data Blocks	Blocks ▼		
	Company Entity Resolution	Level 1	Level 1
	Company Information	Level 3	Level 1
	Filings and Events	Level 2	
	Financial Strength Insights	Level 3	
	Hierarchies and Connections with Full Family Tree	Level 1	Level 1
	Ownership Insights	Yes	Yes
	Principals & Contacts		Level 2
	Third Party Risk Insights	Level 1	Level 2
	Price	£26,962	£9,288
Add Ons			
	Standard Monitoring	£8,040	£2,738
	Cloud Monitoring*	£11,524	£3,925
	D&B AI	£8,089	£2,786

NB: Cloud monitoring is via data sharing platforms, such as Databricks, whereas Standard Monitoring is via STP/email/AWS or Google CS bucket notifications.

COUNTRY RISK DATA PRICING

The Country Risk data can be purchased as a Risk Rating file or Multi-dimensional Analysis Risk Ratings, and the pricing options are shown below.

D&B Country Insight - Data Services	Description	Annual Amount	
		Weekly Updates	Monthly Updates
Country Risk Rating File	Overall country risk rating for all 132 countries."	GBP 5,265	GBP 2,700
