DIGITAL MARKETPLACE G-CLOUD 15 – CLOUD SOFTWARE-PRICING FOR PUBLIC SECTOR ENTITIES ONLY

D&B RISK ANALYTICS PRODUCT & PRICING OVERVIEW

D&B Risk Analytics draws on data and insights from the Dun & Bradstreet Data Cloud trusted by many leading government bodies. The solution features Dun & Bradstreet's comprehensive global data and analytics on more than 620 million companies, including demographics, financial information, corporate family linkage, government and industry compliance status, and diversity classifications.

The product is provided with two different levels of Dun & Bradstreet data, CORE DATA, and if selected CORE DATA+ which adds more detail to the core data attributes pricing is based on these segments as well as **RUM (Records Under Management) – which equates to a discrete business entity (DUNS numbered record) so one DUNS = one RUM.**

Essentially, in Risk Analytics our usage meter tracks your organisation's usage of Core and Core+ reports.

- Your subscription includes a contracted volume of Core and Core+ reports that can be viewed by all users in your organisation/contract
- Each time a Core or Core+ report is accessed for a unique third party or supplier, it counts against your RUM allocation for the subscription term
- The dashboard summary in Risk Analytics displays:
 - The number of Core & Core+ reports viewed
 - The remaining contracted volume available for each report type

(NB: When a Core+ record is accessed it also consumes a Core record allocation, therefore, if you believe you will want all Core+ records you will need to contract for the same volume of each).

Key Points:

- RUM ensures you have visibility and control over your usage of Core and Core+ risk reports.
- Once a third party is under RUM, you have access to their risk data for the duration of your contract.
- Enhanced RPS & RPS+ (for third-party screening) are tracked separately from Core/Core+ RUM.

(Table 1&2), and three different levels of screening (Table 3).

TABLE 1

Select Type *

Core

☒ Company Data - Registration Information Name, Alternate Names, Address, Linkages, Industry Classifications, and Company Principals
 ☒ Financials, UCC Filings, Scores and Ratings
 ☒ Screening without Ultimate Beneficial Owners (If purchased)
 ☒ Diversity, Indicators

Core +

☒ Principals Details
 ☒ Financial History
 ☒ Scores and Ratings Details
 ☒ Event Details
 ☒ Ultimate Beneficial Owners
 ☒ Screening with Ultimate Beneficial Owners (If purchased)

Pricing is flexible, so that you can buy for example 100 supplier record screening, at the CORE price and add CORE+ for say 20 of the records within your supplier portfolio, that may need more of a detailed view from a screening perspective.

Records can all be viewed as CORE and upgraded to CORE+ as required, and are shown on the dashboard for ease of view:

TABLE 2

For example, on the product dashboard view for all Third Parties, where you see a scorecard risk as high, you can upgrade to see further detailed information, as required. The volume recommendation for CORE+ records is 10% – 20% of your full supplier universe, please be aware that if you are using a CORE+ record it automatically uses a CORE record too. Therefore, if you feel you need the deeper dive on all records in your portfolio, take the same number of RUM for each.

PRICING

Prices depend upon region, the number of Core or Core+ records and the module - Risk Analytics Compliance or Supplier Intelligence (RACI or RASI) required; plus the level of screening, and any chosen add-ons such as:

- The Environmental Social and Governance Ranking
- Cyber Risk Rating
- The supplier outreach portal

Prices are for records under management (RUM) see explanation on page 3, there are no additional costs per user.

Example pricing is shown below in Table 4 for 3 example supplier portfolio volumes, if you have any questions, please do speak to the PublicSector@dnb.com or 0800 001234.

RASI INCLUDES THE D&B SUPPLIER EVALUATION RISK – SER & SSI

The SER Predicts the likelihood that a supplier will cease operations without paying all creditors in full, or obtain relief from creditors e.g., restructuring plans, over the next 12 months. The SER rating provides powerful supplier insight by combining key risk indicators into a single rating.

DUN & BRADSTREET LTD, THE POINT, 37 NORTH WHARF RD, LONDON, W2 1AF

D&B STABILITY INDICATOR – SSI

Predicts the likelihood that a supplier will file for bankruptcy, cease operations, or become inactive over the next 3 months. The SSI is developed exclusively on known suppliers in the Dun & Bradstreet Data Cloud to meet the specific needs of supply management professionals.

The minimum contract period is 12 months, and prices do not include VAT, which will be applied at the standard rate.

EXAMPLE - if you are a department wanting to carry out supplier due diligence with a small number of users who require to onboard 25 existing suppliers and take the Core+ deep dive on all records, in Europe and 8 Global suppliers, then add a further 25 European and 2 Global suppliers over the course of a contract year with full Dow Jones screening the costs will be £14,714 annually, for the SI module, plus VAT. Alternatively, if you do not need the Supplier Stability Index and Supplier Evaluation you can pick instead the CI module at £9,782.

This includes Enhanced screening for all records I.E., PeP, Sanctions and Adverse Media screening.

WITHOUT Dow Jones Screening -

You can purchase the same volumes without the Enhanced Screening whereby the CI module would be £5,692 and the SI module £9,804.

Prices are exclusive of VAT, which will be added at the current standard rate.
