PRICING

Pricing is determined by the expected number of requested over a 12-month period and the level of UK and Europe and rest of the world (International) records accessed.

Records Under Management (RUM) Meter - which equates to a discrete business entity (DUNS numbered record) so one DUNS = one RUM.

Tracks your usage based on two types of records:

- **Live Reports**
- **Portfolio Records**
- **How It Works:**
 - Each time you access a unique D-U-N-S number, it is counted against your RUM limit for the annual contract term.
 - Once a D-U-N-S is licensed under RUM, you have unlimited access to its most up-to-date information and features in your portfolio for the rest of the annual term.
- **Regional Application:**
 - RUM pricing and limits are typically set per region or contract, so you may have separate RUM allocations for different regions in your Finance Analytics environment. These are UK and Europe Region 1 and rest of the world (International) records Region 2.
- **Key Benefit:**
 - Unlimited access to licensed D-U-N-S data for the term, supporting robust financial analysis and risk management.
- **Pricing Options - Product Required:**
 - Tier 1 - Finance Analytics Credit Reporter which provides full credit reports but does not allow a user to raise an investigation on a record as to why data may be missing.
 - Tier 1 and Tier 2 - Finance Analytics with the ability to have investigations

Please see the table of functionality below for the different Tiers – in general Tier 2 is the most popular option, due to the ability to monitor changes in a supplier base using the alert function.

Business Process	Tier 1	Tier 2
Ability to search and pull global reports to make judgmental credit decisions	✓	✓
Receive alerts for tracking key changes in interested DUNS transactionally	✓	✓
Perform basic Portfolio Management activities on businesses that have been transactionally assessed	✓	✓
Combine A/R with D&B data & analytics to understand risk exposure and drive cash management strategies	✗	✓
Receive alerts for tracking key changes on entire customer base	✗	✓

Scenario 1 - Credit Reporter Record Volumes & Price
