DIGITAL MARKETPLACE G-CLOUD 15 – CLOUD SOFTWARE-PRICING FOR PUBLIC SECTOR ENTITIES ONLY

D&B CONNECT PRODUCT & PRICING OVERVIEW

D&B Connect streamlines data management, matching and validating data against the Dun & Bradstreet Data Cloud, through the provision of either a Standalone application or via the pre-built software integration into Salesforce.

Leverage the Master Data capabilities of our Live Business Identity, anchored by the Dun & Bradstreet D-U-N-S® Number.

Use contact data, firmographics, corporate linkage, financials, risk scores and predictive analysis for the foresight your company needs to uncover opportunities and evaluate risks.

For a standalone solution submit and receive files through multiple delivery methods, including the Web and FTP, and customise the output to suit your needs.

D&B Connect as a standalone application supports ERP, MDM and AP platforms and CRM platforms other than Salesforce which has an off-the-Shelf connector, please see below:

PRICING OPTIONS D&B CONNECT FOR SALESFORCE

Product pricing is shown below and is based upon:

1. Number of base records to match and update.
2. The levels of data blocks – D&B Data Attributes are made available in blocks by relevant use case. E.G., Financial Risk. The higher the block level number the more data attributes will be provided, as per the Company Information detail below:

Company Information

Provides basic data about a company, including name and address, industry/business activity type, size, and country/region identification numbers.

- **Level1** - Basic information about a company primarily used to validate the Match found in Company Entity Resolution such as Business Name, Primary Address, Telephone, Web Address and Primary Industry Codes. This Level is required as it is the starting point for all data block licenses.
- **Level2** - Additional information on a company including Sales, Employees, Industry Codes, Mailing Address and other information.
- **Level3** - Information on a company's competition, editorial information and Assignment Model data.
- **Level4** - Country specific data elements that are considered of higher value and pertain to the organization. Currently specific to the Japanese market and includes primary supplier and customer names and D-U-N-S Numbers.
- **Advanced Geoposition** - More precise latitude and longitude for pinpointing where a business is located. This side block is available for the Public sector only.

3. Required access to the data per use case. E.G., if you are using the data for one use case such as supply chain needs, but then wish to use the same data for a website to look-up and verify the business logging in – this will be classed as an additional use case, in this case identity verification. The use cases are 5 in total with relevant use case discount structures.

DOMAINS AS BELOW -

PRICING DISCOUNT ON OVERALL COSTS >1 DOMAIN

- a. Compliance
- b. Supply Chain
- c. Finance
- d. Sales & Marketing
