The High Assurance MSP

Automated SDLC Assurance

SERVICE DEFINITION

nine23.co.uk

Service Definition

Nine23 has engineered Platform FLEX as a 100% UK Sovereign private cloud to deliver OFFICIAL-SENSITIVE assurance. This offers a data-centric approach that bridges the gap between hyperscalers and sovereign infrastructure.

Veriom serves as the Continuous Verification Engine for the system ecosystem. The platform service ingests metadata and logs to validate the integrity of the software services being developed, and the application. The service provides mathematical proof of the high assurance environment being maintained and assesses the accredited status 24/7, enabling clients to provide evidential support of the software and service supply chain security.

Service Features

- Alert Fatigue Elimination
- End-to-End SDLC Mapping
- Guided Remediation
- Business Context Intelligence
- Delivered from secure environment (Platform FLEX)
- Unifies, Analysis and Remediate based on intelligent ruleset
- Maps vulnerabilities against specific controls including 3rd party libraries.
- Proves 'clean-pipe' status from ingestion to deployment
- Ensuring "Above Official" Compliance via Walled Garden Architecture
- Enterprise-grade protection at a fraction of the cost of single hire

Service Benefits

- Continuous Sovereign Verification
- Software Development Lifecycle and Supply-chain Assurance
- Ensures that no client data or metadata leaves the UK
- Reduces 'noisy' alerts to evidenced controls – in minutes
- Hands-on implementation
- Extended Security team
- Shared accountability for outcomes
- Secure by Design gap Analysis
- Unified Reporting

Problems Solved

Where most security monitoring services are focused (and often limited to) visibility of the

infrastructure and network components, the majority of vulnerabilities are introduced within the development pipeline; which is where the Automated Software Development Assurance Service is focused.

The Nine23 service, FLEX hosted Veriom instances, create a unified security graph across your infrastructure, code and tools—providing the business context your alerts have been missing.

Software Development Lifecycle (SDLC) Assurance on a UK Sovereign platform that ensures:

- **Regulatory Compliance:**
 - GDPR & UK DPA Full compliance with EU/UK data protection laws
 - Industry Standards: ISO 27001, SOC 2, HIPAA, DORA, PCI DSS
- **Data Security:**
 - Read-Only Access Never modifies client code or systems
 - AES-256 Encryption Data encrypted at rest and in transit

- **Data Residency:**
 - UK only
- **Client Control:**
 - **Isolated Workspaces:** Each client in separate secure environment
 - **Data Portability Clients:** can export their data anytime

What Nine23 Do & Why

Nine23 is a veteran-owned **UK Sovereign, High-Assurance Managed Service Provider (MSP)** delivering cyber secure, resilient digital services for mission-critical operations.

Our service offerings include:

- InfoSec Advisory and Assurance
- Private/Hybrid Cloud
- Secure Collaboration
- Interoperability

Our solutions are built to meet the most stringent regulatory compliance requirements and are fully aligned with NCSC/DSIT guidance and Secure by Design principles. We enable individuals and organisations to operate with confidence, security and compliance.

Who Nine23 Work With

Nine23 delivers exceptional services to Discerning Clients in **UK Regulated Sectors who handle protectively marked data at above OFFICIAL**. We enable the HM Government,

National Security and Public Safety, Defence Industry and their supply chains to collaborate and interoperate with simplicity, without ever compromising on security.

We have demonstrated significant achievements in difficult to break into sectors and have a stellar list of clients which demonstrates our credibility.

How Nine23 Work

Our Model

Our operating model builds security, usability, and compliance in from day one, so your technology, people, and processes work seamlessly together. As cyber threats evolve, so do we – keeping your users secure, empowered, and productive through continuous improvement, user-focused design, and UK sovereign solutions that meet national security standards.

Define - Your Problem

We understand information security and assurance as a business enabler, not a constraint. Our experts will conduct a comprehensive discovery phase to assess current capabilities and risks, define key security objectives, compliance standards, and end-user requirements, and develop a clear roadmap that enables digital transformation with high assurance at its core.

Build - Your Solution

We combine the best technology from the best vendors to create an environment that enables individuals to work together effectively and securely. Leveraging trust, innovation, and a depth of sector experience to provide collaboration and interoperability.

Manage - Your Service

We deliver high assurance and resilient managed services that enable seamless interoperability for teams to access the data and applications they need to work collaboratively. Our managed services include:

- 24/7 monitoring, proactive risk management, and compliance assurance
- Threat detection, response, and continuous security improvements
- A transparent Service Level Agreement (SLA) ensuring clear accountability

Why Choose Nine23?

Enabling the end user is the heart of everything we do, empowering them to work with the same simplicity and usability they expect at home, without ever compromising on security.

We are **trusted, proven experts with a strong track record** of delivering nationally accredited, user-focused solutions in complex and highly regulated environments.

We deliver high assurance solutions **accredited for use at OFFICIAL (including SENSITIVE and other caveats) through to SECRET**, meeting the most stringent cyber security requirements. As a fully UK-owned and operated company, with all staff, infrastructure, and data located in the UK, we provide genuine **100% UK data sovereignty**.

Above all, we are **refreshingly honest**. Building long-term relationships through transparency and integrity, with no jargon or hidden risks, just secure solutions that deliver real operational value.
