

The background is a dark blue to black gradient, overlaid with a complex network of glowing yellow and orange nodes connected by thin, radiating lines. Some lines are thicker and more prominent, creating a sense of depth and connectivity. The overall effect is reminiscent of a digital network or a starry sky.

1 ID Center Pricing

General pricing disclaimer

Please note, that the subsequent user based fees as laid out **only include application fees per user and year**. For complete up and running service cost deployment and operation cost must be added.

The ID Center service can be implemented in a number of different ways according to the customer's requirements. Available options include:

- ▶ Installation and deployment on customer's premises or customer's data center, run by customer's IT operation services.
- ▶ Installation in customer's 3rd party engaged data center (aka private cloud) run by customer's IT operation or by a third party operation.
- ▶ Installation and deployment in a public cloud run by Worldline on Customer's requirement.

Depending on the by customer required operation and deployment configuration deployment and operation cost will vary and Worldline will offer respective contracts. Worldline will in all cases provide the application licences accompanied by SW- insurance and L3-support as a minimum delivery, which are reflected by the price tables in this document.

On-boarding

In our experience, our Customers usually want to try out our service and get first experience e.g. on biometric authentication. Worldline will set up a tenant in a Worldline public cloud environment, provide first administrative access to the service and deliver client SW and optionally HW devices for this purpose. Furthermore, the customer's desktop services will receive limited support for the client SW installation. Worldline offers a demo package for the trial.

Customers can also choose to buy support if required on a Time and Materials basis.

Demo Set-Up Package: £ 7.200

This package is for demo purposes and includes services for minimal testing requirements and little need for support. HW devices (e.g. fingerprint scanners) can be provided on request on cost as is basis. It is limited to 30 days duration. This includes:

- ▶ Production set-up (1 tenant in Worldline controlled public cloud) for 30 days
- ▶ 2 administrators (1 admin, 1 enroller) with 2-factor OTP authentication for access
- ▶ Kick-off telephone conference
- ▶ 0.5 day Solution Manager - consulting
- ▶ 0.5 day Service Manager
- ▶ 2 days Technical Specialist for client SW installation on one desktop machine and integration of 2 applications via EasyLogin
- ▶ 5 test users for 30 days
- ▶ Technical on-boarding documentation
- ▶ L3 Email support 2 days included during 30-day trial period

Travel costs for onsite services not included and are invoiced as is.

Further available services are:

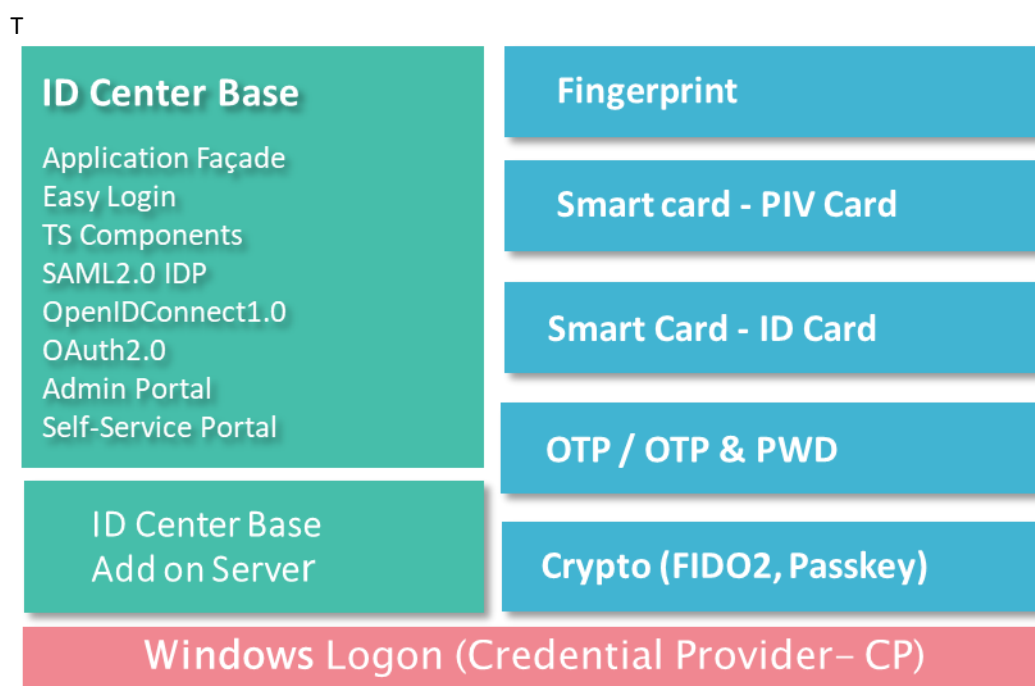

- ▶ Development support (15h): £ 2.400 Price
- ▶ Consulting and Training (daily rate): £ 1.200 Price
- ▶ Coaching for enrolment (daily rate): £ 1.200 Price
- ▶ Administrator training (daily rate): £ 1.200 Price
- ▶ Additional technical resources will be charged at the prevailing daily rate: £ 1.200 Price

All services are provided either online or onsite. Prices do not include travel expenses and will be charged as is.

1.1 Application Fee Charges

The following section describes the application fees for different amounts of end-users accessing the service for authentication purposes.

The final run charge is calculated by adding all relevant purchased application components and optionally the separately offered operational run fees for the selected end-user volume. Available application components are:

The tables below shall be used to determine the price per component and end-user volume. Higher user volumes can be provided upon request.

Base

End user volume	Price per user and month
500-999	£ 1.62
1000-1999	£ 1.36
2000-2999	£ 1.17
3000-3999	£ 1.06
4000-4999	£ 0.99

Fingerprint

End user volume	Price per user and month
500-999	£ 0.46
1000-1999	£ 0.39
