

ID Center

Your secure platform
for digital identity

Trusted Services

Product overview

Secure digital identity in a digitalised world

In an increasingly digital world, the demand for secure, efficient, and trustworthy digital identity solutions continues to grow.

ID Center is a GDPR-compliant platform for fast and secure authentication — using biometric characteristics, ID tokens, or one-time passwords.

Challenges in the field of digital identity

Security & fraud prevention

Clear identification and authentication protect against identity theft and online fraud, while ensuring full protection of privacy.

Regulatory requirements & data protection

Compliance with standards such as PSD2, eIDAS, NIS guidelines, and 21 CFR Part 11.

User-friendliness & efficiency

Fast, secure processes — with no compromise on the user experience.

Use cases for end users (CIAM)

Banks & financial institutions

Biometric security and multi-factor authentication for protected online transactions.

Tourism & leisure

Ticket validation using biometrics prevents fraud and increases revenue at events and attractions.

Secure self-service

Authentication for registration and administrative workflows in e-government and corporate portals — efficient, customised, and self-service enabled.

Healthcare

Biometric patient verification in telemedicine, secure patient records, and reliable re-identification during treatments.

Use cases for employees

Healthcare & insurance

Secure access to digital patient records and fast user switching at shared workstations.

Chemicals & pharmaceuticals

Compliant authentication in accordance with 21 CFR Part 11 — biometrics replace passwords and protect against manipulation and unauthorised access.

Critical infrastructure

Multi-factor authentication with offline functionality and role-based access control — designed for NIS2 compliance.

Our advantages at a glance

Wide range of authentication methods

Biometrics, smart cards, OATH tokens, and FIDO.

Maximum security

Protected biometric templates, role-based access control, and comprehensive audit mechanisms.

Fast Identify

Ultra-fast biometric authentication within large user groups.

Open standards

SAML 2.0, OIDC, WebAuthn, and API integration.

Scalability & flexibility

On-premise or cloud-based deployment.

Comprehensive controls

Role, rights, audit, and monitoring functions.

Digital sovereignty starts here.

Protect your data with ID Center — secure, convenient, effective.
