Flexigrant Pricing

Overview of Pricing

Flexigrant costs from circa £32k in year 1 (including year 1 hosting and support).

Prices are indicative and represent a standard implementation of a single Flexigrant tenant, bandwidth, transactions and from 3 user licences. Changes to these as required by a customer will be discussed as part of the engagement and variations will be subject to agreement and use of the SFIA rate card where appropriate.

Annual recurring costs include hosting, licence fee, and support.

Flexigrant Licensing Pricing

Flexigrant is provided as Software as a Service (SaaS).

Flexigrant is priced on a 'per concurrent user per month' basis. This licence price is a composite price that covers:

- Software licence
- Hosting of the solution
- Access to a support desk (for your scheme administrators)

The standard list price for a Flexigrant licence for

2026 £2,445

2027 £2,616

2028 £2,799.

Volume discounts are available as the number of licences required increases:

Band	Per User
3 – 10 Concurrent Users	As per year above
11 – 20 Concurrent Users	20% off base cost per user
21 – 30 Concurrent Users	37% off base cost per user
30+ Concurrent Users	66% off base per user

*NB the minimum number of user licences that can be purchased is 3.

A standard implementation (single Flexigrant tenant) is provided with 50GB of data storage, unlimited incoming bandwidth and 200GB outgoing bandwidth per month. Additional storage requirements based on customer requirements would be discussed at engagement.

Implementation Fees

Implementation services are provided to cover training and implementation support/configuration. This may include consultancy to review, redesign and improve grant management processes. The rates typically applied for implementation work are summarised in the following table:

Role	Rate
Principle Consultant (Process Reviews)	£1,400
Senior Consultant (Implementation and Training)	£1,239
Consultant (Implementation and Training)	£1,000

Illustration of Flexigrant Pricing

Flexigrant costs from £37k in year 1 (including year 1 hosting and support). Prices are indicative and represent a standard implementation, bandwidth, transactions and from 3 users. Changes to these as required by a customer will be discussed as part of the engagement and variations will be subject to agreement and use of the SFIA rate card where appropriate.

A standard implementation is provided with 50GB of data storage, unlimited incoming bandwidth and 200GB outgoing bandwidth per month. Additional storage requirements based on customer requirements would be discussed at engagement.

Training and implementation services are not included in the licence fee and is subject to the SFIA rate card. Typically, around 20–30 days of implementation and training is required as standard but this is dependent on the scale of the implementation and any specific requirements. This work is usually led by either a Project Manager or Senior Consultant.

Integration with other systems e.g. CRM, finance and websites would be scoped and then priced according to client requirements.

Adoption of New Flexigrant features e.g. AI features would be available based on the published feature price list at that time.

Expenses

On the occasions we may be required at Client premises during implementation (i.e. for project initiation, configuration workshops and training) we will charge for reasonable, valid expenses for mileage, lodging and subsistence at the rates

illustrated below. All expense rates would be agreed during contract discussions and aligned with the policy and practices of the Client.

Description	Costs
Mileage	£0.45 per mile
Hotel	At cost
Train Fair	Standard class at cost
Car Hire	Standard cost for a compact car
Car Parking	At cost
Air Fare	Standard class at cost
Subsistence	£25 per day
Courier	At cost

Volume Pricing

A volume discount may be available depending on the number of grant schemes to be implemented or data migrated.

Additional bandwidth and storage may be available and can be considered during contract discussions.
