About CoreFiling

The CoreFiling vision

Regulatory compliance is one of the fastest-growing challenges facing the corporate world today. At CoreFiling, we believe that CFOs deserve accurate and timely financial information. We believe that creating, reviewing and managing regulatory information should be straightforward and quick. We believe that CFOs and their professional advisers should be able to meet their compliance obligations without complicated validation and assurance processes.

CoreFiling has been providing straightforward solutions for online filing for over twenty years. Known for its high-quality modelling, data validation and development services, CoreFiling also provides XBRL consulting and enhanced data management to filers, regulators, exchanges and the financial community.

CoreFiling's True North Data Platform (TNDP) provides enterprise-strength XBRL processing.

1.1 About the company

The CoreFiling Group is privately held, with a substantial history in the successful design, publication and validation of XML and XBRL. Our success is based on tools and services created with an uncompromising commitment to engineering excellence.

The company is an active member of the XBRL jurisdictions and working groups which promote the adoption of the standard and oversee its development.

The company has pioneered a number of innovations both as a result of our work with clients and stemming from our research and development activities.

COREFILING AND G-CLOUD 12

1.2 True North Data Platform SaaS Pricing

As the TNDP encompasses all CoreFiling's intellectual property, and the breadth of functionality and filing mandates supported varies from client to client, there is no one-size-fits-all price. Indicative pricing ranges from GBP 300,000 for a small regulator or registrar, to over GBP 2,000,000 for a large regulator using a broad range of functionality for very large data collection and processing.
