

PRICING MODEL

The price below shows a Citrix Application delivery of the SharpCloud product; this is the most common deployment model used by our SLI customers due to interoperability and compatibility issues across the MOD network. Depending on suitability alternative deployment options are available to our customers including direct web-app and Citrix Desktop clients; these can be priced on request.

SECRET SUBSCRIPTION PRICING - CITRIX			
	Creators+ – Price/User per Year GBP	Collaborator – Price/User per Year GBP	Read Only - Price/User per Year GBP
