

Optimising what you have, building what you don't

SoftwareOne Cloud Services

Moving to the cloud is the key to transforming business, unlocking innovation, and becoming more competitive. An independent partner sees the big picture and works side-by-side with you to deliver on the promise of cloud.

Embracing cloud is not one-size-fits-all. SoftwareOne takes a neutral, data-driven approach to envisioning your custom seven Rs roadmap, guiding choices by what is most cost-optimised and aligned to your intended business outcomes.

Relocate and Rehost

Build a robust cloud foundation and migrate at pace and scale.

Replatform and Refactor

Modernise applications with cloud-native architectures.

Relicense

Rationalise and optimise your software and cloud investments.

Retire and Retain

Sunset applications with inadequate ROI or defer action on select workloads.

With strong partnerships with Microsoft, AWS, and Google, and unique capabilities in software licensing and IT asset management, we'll show you how to sequence application rationalisation, software cost take-out, and cloud migration to maximise the value of your software and cloud investments, helping you do more with less.

SoftwareOne's global reach and flexible end-to-end services means we can meet you wherever you are on the journey to cloud, whether that's helping you take your best next step or building a comprehensive cloud transformation strategy with you and your team.

- Cloud adoption and migration readiness
- Cloud financial management (FinOps)
- Licensing assessment and rationalisation
- Application modernisation
- Cloud best practices (well architected review, centre of excellence, and more)
- DevOps
- Cloud security
- Cloud managed services

Benefits of our approach:

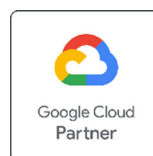

- Establish a strong and secure foundation for cloud adoption.
- Migrate to the cloud at pace and scale.
- Make intelligent decisions when charting the course for your application portfolio with a proven partner who can deliver across all three large hyperscalers and all seven Rs of cloud transformation.
- Level up your cloud capabilities through architecture, security, DevOps, and FinOps best practices.
- Maximise return on investment through software cost take-out, cloud financial management (FinOps), and hyperscaler incentives.
- Transfer skills to your team as they learn alongside cloud experts.
