

Customer AI Solutions

Commercial Offering

29.01.2026

SoftwareOne's Customer AI Solution helps organisations adopt AI confidently and responsibly. We combine strategy, data readiness, governance, and security with real delivery—such as AI agents, Copilot extensions, and custom models. It is designed to work across Microsoft (Copilot, Azure OpenAI), Google (Vertex AI), and multi-cloud environments. Everything is wrapped in adoption and ongoing optimisation to ensure measurable business value and safe AI at scale.

The Service normally includes **strategy, data readiness, security & governance, adoption, and optimisation**.
