

Device Compatibility Testing

Edge Testing Solutions Ltd trading as Resillion deploys its Device Compatibility Testing service to provide a low cost, on demand solution to ensure that your mobile apps function as designed. With over 80 physical devices available (iOS, Android and Windows) we can provide you with the necessary confidence that your software is usable, error-free and will not result in a frustrated end user experience.

Utilising the services from our Regional Technology Centres based in Glasgow, Birmingham and Manchester, Resillion can provide a full UK based remote Device Testing service. The cost of the service is based on the personnel only – the devices are included in the price. We can rapidly and cost effectively provide you with valuable assessment of quality, usability and performance of your mobile apps. This service can be provided as a stand-alone service or integrated into wider deployment.

Features:	Benefits:
• Rapid deployment of qualified test specialists • Over 80 physical devices located in our device lab • Remote testing on iOS, Android and Windows devices • Low cost, on demand, UK based service • Thorough, in depth knowledge of mobile testing • Automated compatibility testing over varied emulated/actual devices • Testing integration of your apps with Social Media • Incorporate performance testing to assess functionality under load	• Objective, independent review backed up by a professional report • Extensive selection of actual and emulated devices • Emphasis on physical device testing and all mobile related tests • A rapid evaluation of functional aspects • Detailed feedback on user experience for you applications • Secure, online collaboration during the entire process • Confidence in non-functional aspects – including performance, security and usability

Pricing

The pricing model adopted for each engagement is based on the specific project requirements and can be delivered on either a time and materials or fixed price basis. Please see attached Pricing document.
