Combining our expertise with our alliance tech solutions, we harness the power of smart technologies. Together, we solve your most complex business issues to create sustainable success.

Cloud Security Posture Management (CSPM)

Service Description:

KPMG's evidence-backed Cloud Security Posture Management (CSPM) strengthens the protection of data stored and shared in the cloud. Through continuous monitoring, it detects misconfigurations and compliance risks early. KPMG supports the design, build, and operation of CSPM solutions to enhance security, streamline processes, and improve overall productivity.

Service Categories

- Cloud Security Posture Management (CSPM)
- Infrastructure as Code Scanning (IaC)
- Cloud Infrastructure Security Posture Assessment (CISPA)

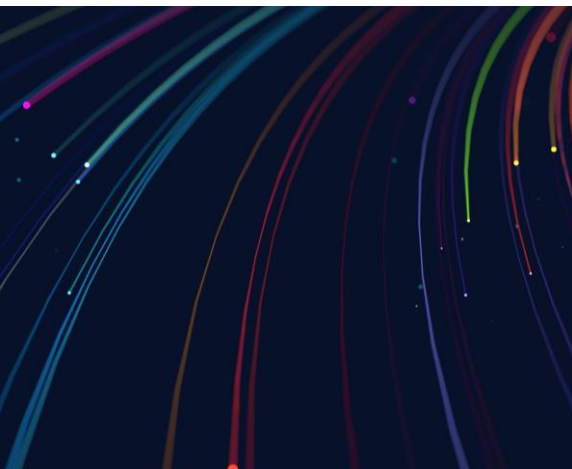

Service Benefits

- Identify and remediate misconfigurations
- Enforce compliance
- Monitor activity and detect anomalies
- Automate security tasks
- Integrate with other security tools
- Implement strong access controls
- Encrypt data at rest and in transit
- Regularly back up your data
- Legal and regulatory compliance issues

Our Service Features

- Vendor selection
- Security process design and implementation
- Security tool and automation design and implementation
- Combined security reporting
- CSPM rule implementation
- Alignment to standards/frameworks
- Security knowledge transfer and training

Our Approach

KPMG proposes a well-defined approach that will assist in delivering a customised solution that meets your requirement. Using our global framework, industry experience and methodologies we will accelerate your journey to cloud, adoption of your operating model structure, creation of a resilient architecture and business case.

Requirements

Cloud security posture management requires a proactive approach, encompassing continuous monitoring of cloud environments, identification and remediation of security risks, and ongoing compliance with relevant regulations. This ensures the ongoing protection of cloud resources, minimises security vulnerabilities, and maintains compliance with data privacy and security standards.

Activities

Mobilisation

- Gather key stakeholders to define project scope and objectives.
- Establish clear communication channels and project governance.
- Kick off the project with an initial stakeholder meeting to align on goals.

Planning

Planning is a collaborative exercise; with you we will:

- Conduct detailed requirement gathering sessions to capture specific needs.
- Develop a comprehensive project timeline and milestone plan.
- Identify required resources and tools for implementation.

Design

- Architect a scalable, compliant cloud solution.
- Define high-level and low-level detail.
- Ensure the design meets both current and future business requirements.
- Progress through internal governance as required.

Delivery

- KPMG practices agile delivery for security solutions, taking a DevSecOps approach.
- Collect feedback on an iterative basis and adjust implementation, as necessary to ensure the best possible outcomes are delivered.

Outcomes

KPMG practices agile delivery of security solutions, therefore the plan will contain opportunities to iterate on the solution. During iteration phases we will collect feedback from relevant stakeholders and if necessary, adjust the implementation to ensure the best possible solution is achieved for the client.

High-Level Timelines

Our indicative timeline is based on our experience of delivering similar engagements for multiple organisations. Once engaged, we will work with you to create and agree a bespoke plan to meet your specified requirements.

Why KPMG

Top Professional Brand

KPMG has a strong brand and excellent reputation. We are focused on customer needs and have a pragmatic approach for the design and delivery of our Projects. Our team has a proven track record of delivering similar engagements and an intimate knowledge of challenges faced by our clients.

Constructive Input and Challenge

We consider it to be our responsibility to bring an independent perspective and constructively challenge existing processes and systems. We will highlight and share with you both internal and external leading practices.

We Employ a Collaborative and Integrated Team Approach

We deliver a full suite of evidence-backed recommendations in collaboration with KPMG sector and technical experts in all parts of our business around the globe. By working in multi-disciplinary teams, we can deliver holistic thinking and insights for even the most complex challenges.

We Have Strong Relevant Recent Credentials

We have worked across multiple industries and will bring insights from other sectors to challenge your thinking. We have vast Cloud and DevOps expertise within our technology practice in the UK region alone, who cover everything from hosting strategies to building landing zones. We produce agile, resilient and efficient IT functions that support the wider enterprise.
