

Asset Management Systems

A KPMG Service for G-Cloud 15

Introduction to KPMG's Asset Management Systems Service

Service Description:

Asset-intensive organisations remain resource-intensive and ripe for digital transformation:

- Digital transformation programmes are failing to deliver
- Traditional asset management approaches have not kept up with the pace of change
- Supplier-driven point solutions are propagating inefficiency and waste of resources
- Organisations are failing to realise the benefits of technology advances

We enable the rapid deployment of Asset Management Systems to unlock value.

We help organisations identify, assess, plan, implement and maximise the value of new and existing third party technology solutions.

What are the benefits of KPMG's Asset Management Systems service?

- A global infrastructure network at the forefront of Infrastructure Advisory good practice
- Established solutions ecosystem from technology majors to start-ups to bring innovative, robust and scalable solutions
- Working with large, complex asset-intensive organisations across multiple sectors and asset classes
- Helping navigate the complex technology and systems landscape
- Building the case for asset management system use and integration and securing stakeholder sponsorship
- Managing and delivering implementation and integration to deliver long-term organisational transformation objectives

Our service features

- Identifying immediate and longer-term performance and productivity opportunities to unlock value for customers, investors and stakeholders
- Development of effective future systems landscapes
- Horizon scan of potential asset management systems providers for client problems
- Assessment of applicable systems
- Implementation roadmaps, cost-benefits analysis and business case development
- Operating model design for business change
- Change management, training, design, assurance and implementation.

KPMG Approach

Our approach takes a strategic perspective, combining the best of infrastructure advisory with knowledge of the technology landscape and a focus on outcomes to identify solutions that drive sustainable value

Infrastructure

Deep infrastructure expertise across multiple sectors...

- Our global infrastructure network keeps us at the forefront of Infrastructure Advisory good practice
- We work with large, complex asset-intensive organisations across multiple sectors and asset classes
- We understand what it takes to go beyond the ISO standards, and where there is value in doing so

Technology

...plus data, analytics and digital capabilities...

- Helping you navigate the complex technology and systems landscape
- Market leading digital and data analytics approaches
- Partnerships and accelerators for all key systems and vendors

People

...with a focus on people...

- Delivering sustainable change by focusing on your people and embedding a digitally-driven approach to infrastructure management
- Bringing experience through certified asset management, operations and digital specialists, who have made this happen in highly regulated industries.
- A global presence across 150 countries, with resources and expertise to serve clients around the world.

Value

... to deliver better outcomes and organisational impact

- Building the case for change and securing stakeholder sponsorship
- Improving productivity, organisational effectiveness and efficiency and the channels to 'cash out' and unlock value
- Managing and delivering change to deliver long-term organisational transformation

Why KPMG

Helping organisations exploit existing tools and deploy new asset management systems to maximise assets value

Specialist Solutions

We have an ecosystem of partners who are delivering cutting-edge specialist solutions that are pushing the boundaries of asset management systems capabilities in asset-intensive sectors like water, rail, power and defence.

We provide the configuration, implementation and change management to support the technical know-how of these technology partners to help organisations realise these benefits.

Enterprise Asset Management Systems

We design and implement processes and workflows to help our clients manage projects and assets more effectively in their enterprise management systems.

We can help configure systems and provide the business change layer to make sure that systems changes translate into business improvements.

Dashboards/Reporting

We work with all the major dashboard, reporting and analytics tools and can help organisations get instant impact from their data.

We have helped organisations move from spreadsheet models to robust, supported, professional dashboards and reports that can be deployed across the business.

Case study

We implemented an **enterprise asset management system** for a large fleet-based manufacturer through reviewing and digitising its asset information, system requirements and operational processes.

Case study

As Asset Management Business Partner we supported a **large UK retailer** in reviewing and developing its asset information, system requirements and processes spanning all asset classes across the business as part of its **Enterprise Resource Planning** systems implementation

Case study

We recently helped a large infrastructure organisation **stabilise and improve its internal rostering toolkit** to support modernisation of its maintenance practices.
