

KPMG SOFY

GRC & Analytics

A KPMG Service for G-Cloud 15

Service Details

Introduction to KPMG's Sofy Analytics Platform

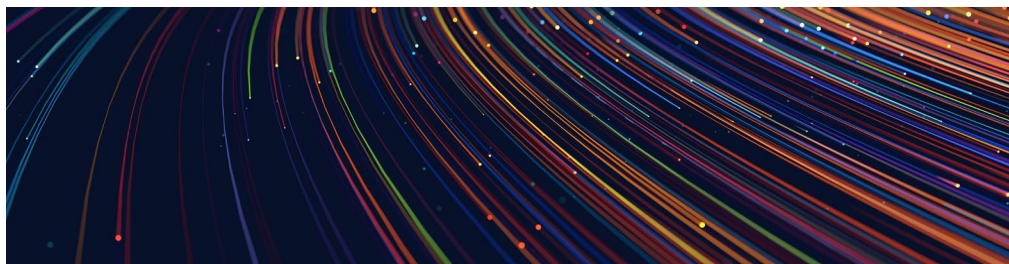

Service Description:

It's a common challenge, and with the proliferation of digital content in the world, it's not getting any easier. Your organisation may have better access to data than ever before. But an increasingly complex analytics landscape makes finding the right information – at the right time – to make informed decisions is like looking for a needle in a haystack.

Our integrated platform is run on a subscription-based model, and offers advanced, configurable, and ready-to-use data analytics solutions. And that allows you to make better business choices, manage risk, and improve overall performance

Accessible anywhere via the cloud, KPMG Sofy Suite delivers in-depth business insights in real-time through notifications and alerts, making data easy to monitor, evaluate, and mobilize. Developed by the KPMG global team of professionals – each armed with deep data analytics experience – the Sofy Suite uses leading technology components that have earned a reputation for quality and reliability.

What are the benefits of KPMG Sofy Analytics service?

- Control end-to-end access to your valuable information by identifying SoD violations and mitigating risk related to system access (Oracle, SAP & many Other ERPs).
- Automate the execution of your control processes by using a repository of leading practice indicators.
- Maintain and review your policies and standards, and gain insight to government regulations through a central repository.
- Go beyond a single organization to provide risk control to all your entities and subsidiaries through a centrally managed repository.
- Monitor key performance indicators for procurement, sales, and reporting processes and determine effectiveness.
- Use data analysis to help optimize your supply chain in a sustainable way.
- Identify potentially risky manual entries and take action quickly using analysis, reporting and workflows.
- Simulate the impact of different IFRS 16 transition options on your P&L, balance sheet and cashflow.
- Monitor data quality throughout your systems and identify activities you can take to cleanse and improve it.

Our service features

Data Management & Integration

Manage the seamless import of customer data, continuous and robust data processing and real-time data integration;

Workflows, Forms & Objects

Create dynamic workflows on top of the data, gather data by surveys or forms and constantly maintain an audit trail

Analytics & Algorithms

Leverage real-time analysis, data combination and continuous monitoring to manage KPIs and business rules

Dashboards & Visualisations

Present results of data analyses to end-users by creating dashboards which are interactive, responsive and accessible from many devices

Tasks & Notifications

Alert and notify responsible users of their tasks, manage accountability and ensure that all relevant activities are performed in time.

Access & Organisation

Create authorisation schemes to set up who views what and make use of audit logs to establish full traceability

Packages

Create application packages to structure and bundle objects and make use of visualisations in a ready-to-use app
